Recorded Music in Creative Practices Georgia Volioti, Daniel G Barolsky, 2024-07-09 Recorded Music in Creative Practices Mediation Performance Education brings new critical perspectives on recorded music research artistic practice and education into an active dialogue Although scholars continue to engage keenly in the study of recordings and studio practices

less attention has been devoted to integrating these newer developments into music curricula. The fourteen chapters in this book bring fresh insight to the art and craft of recording music and offer readers ways to bridge research and pedagogy in diverse educational, academic, and music industry contexts. By exploring a wide range of genres, methods, and practices, this book aims to demonstrate how engaging with recordings, recording processes, material artefacts, studio spaces, and revised music history narratives means we can promote new understandings of the past, more creative performance in the present, and freer collaboration and experimentation inside and outside of the recording studio, enhance creative teaching and learning, inform and stimulate reform of the institutional processes and structures that frame musical training, and ultimately promote more diverse music curricula and communities of practice. This book will be of value to educators, researchers, practitioners, performers, composers, recordists, students in music, and music-related fields, recording enthusiasts, and readers with a keen interest in the subject.

Creative Women of the "Lost Generation" Kimberly Francis, Margot Irvine, 2023-08-11. This book explores the creative women of the Lost Generation, including painters, sculptors, film makers, writers, singers, composers, dancers, and impresarios who all pursued artistic careers in the years leading up to, during, and following World War I. These women's stories and the art they created, commissioned, mobilized as propaganda, and performed shed light on the shifting nature of gender norms during this period. With the combined knowledge and expertise from different contributors, chapters in this book consider how modernist practices continued their development in women's hands during the war, through networks forged by and for women artists in the absence of their male colleagues. These chapters also reflect on how, in many cases, the dissolution of these structures after the November 1918 armistice had detrimental consequences for their professional trajectories. This book challenges the place creative women currently hold in the historical record while also clarifying how these artists and impresarios contributed to wartime and post-war culture. This collection of essays will be of great value to scholars interested in social and gender history of the twentieth century, as well as historians of the arts, through offering nuanced understanding of the essential work of female creative professionals, highlighting artistic women's experiences of resistance, mourning, and reinvention in the shadow of the Great War.
