Düring, Tessa D. Stek, 2018-03-29 The Archaeology of Imperial Landscapes examines the transformation of rural landscapes and societies that formed the backbone of ancient empires in the Near East and Mediterranean Through a comparative approach to archaeological data it analyses the patterns of transformation in widely differing imperial contexts in the ancient world Bringing together a range of studies by an international team of scholars the volume shows that empires were dynamic diverse and experimental polities and that their success or failure was determined by a combination of forceful interventions as well as the new possibilities for those dominated by empires to collaborate and profit from doing so By highlighting the processes that occur in rural and peripheral landscapes the volume demonstrates that the archaeology of these non urban and literally eccentric spheres can provide an important contribution to our understanding of ancient empires The bottom up approach to the study of ancient empires is crucial to understanding how these remarkable socio political organisms could exist and persist **Greek Religion in Tauric Chersonesos** Tetiana Shevchenko, 2023-08-17 Tauric Chersonesos was one of the prominent ancient Greek centres on the north coast of the Black Sea This comprehensive study of the cults of the gods of the Chersonesan polis firmly based on the available sources sheds new light on the religious life of this ancient Greek centre at various stages in its development [The Archaeology of Roman Surveillance in the Central Alentejo, Portugal](#) Joey Williams, 2017 During the first century B C E a complex system of surveillance towers was established during Rome's colonization of the central Alentejo region of Portugal These towers provided visual control over the landscape routes through it and hidden or isolated places as part of the Roman colonization of the region As part of an archaeological analysis of the changing landscape of Alentejo Joey Williams offers here a theory of surveillance in Roman colonial encounters drawn from a catalog of watchtowers in the Alentejo the artifacts and architecture from the tower known

as Caladinho and the geographic information systems analysis of each tower's vision Through the consideration of these and other pieces of evidence Williams places surveillance at the center of the colonial negotiation over territory resources and power in the westernmost province of the Roman Empire
