Crisis And Innovation In Asian Technology:

Crisis and Innovation in Asian Technology William W. Keller, Richard J. Samuels, 2003-02-03 In mid May 1997 a financial crisis erupted in Asia after an attack by private investors on the baht the Thai currency The crisis spread quickly across the region where investor confidence plummeted resulting in massive capital outflows stock market collapses high unemployment and even insurrection The Asian economic miracle that had stimulated so much awe and even dread now invoked pity and apprehension in greater measure The contributors to this volume investigated change in the innovation and production systems of Asian states in response to economic and political upheaval They conducted empirical studies of several regional industries autos semiconductors and hard disk drives and seven different national economies China Malaysia Japan Singapore South Korea Thailand and Taiwan In the face of crisis and global competition the Asian states superimposed change at the margins seeking unique technohybrid solutions to build capabilities to compete in local regional and even global markets

The Economy-security Nexus in Northeast Asia T. J. Pempel, 2013 The dynamics of Northeast Asia have traditionally been considered primarily in military and hard security terms or alternatively along their economic dimensions This book argues that relations among the states of Northeast Asia are far more comprehensible when the mutually shaping interactions between economics and security are considered simultaneously It examines these interactions and some of the key empirical questions they pose the answers to which have important lessons for international relations beyond Northeast Asia Contributors to this volume analyze how the states of the region define their security and how bilateral relations in hard security issues and economic linkages play out among Japan China and the two Koreas Further the chapters interrogate how different patterns of techno nationalist development affect regional security ties and the extent to which closer economic connections enhance or detract from a nation's self perceived security The book concludes by discussing scenarios for the future and the conditions that will shape relations between economics and security in the region This book will be welcomed by students and scholars of Asian politics Asian economics security studies and political economy
