By David Rosner Hives Of Sickness 1st First Edition:

Hives of Sickness David Rosner, 1995 An 1865 report on public health in New York painted a grim picture of high brick blocks and closely packed houses literally hives of sickness propagating epidemics of cholera smallpox typhoid typhus and yellow fever which swept through the whole city In this stimulating collection of essays nine historians of American medicine explore New York's responses to its public health crises from colonial times to the present The essays illustrate the relationship between the disease environment of New York and changes in housing population social conditions and the success of medical science linking such factors to New York's experiences with smallpox polio and AIDS The volume is essential reading for anyone interested in American public health and the social history of New York The contributors are Ronald Bayer Elizabeth Blackmar Gretchen A Condran Elizabeth Fee Daniel M Fox Evelyn M Hammonds Alan M Kraut Judith Walzer Leavitt and Naomi Rogers David Rosner is a professor of history at Baruch College and The Graduate School of the City University of New York Robert R Macdonald is the director of the Museum of the City of New York A publication of the Museum of the City of New York Choice Reviews 1995 November This is one of a series of books focusing on the impact of disease intended to enhance the understanding of both past and present regarding reactions to periodic epidemics Robert B Macdonald director of the Museum of the City of New York which supports this series states The individual and collective responses to widespread sickness are mirrors to the cultural religious economic political and social histories of cities and nations Rosner selected eight renowned and respected individuals to describe the reactions and responses to smallpox polio and AIDS epidemics in New York City since 1860 and the efforts of officials and professionals to deal with the impact of disease Essayists present disease broadly from economic social political and health perspectives Causes of epidemics include the expected and usual thousands of immigrants pouring into the city inadequate water and food supplies lack of sewage disposal unemployment leading to poverty An unexpected cause was the avarice of real estate investors inexorably driving up housing costs Highly recommended for all students of history public health health policy and sociology Upper division undergraduate through professional Copyright 1999 American Library Association Healing Gotham Bruce F. Berg, 2015-03-01 New York City provides the ideal context for studying urban public health policy Throughout its history New York City has been challenged by a variety of public health crises Since the nineteenth century when it became one of the first American cities to develop a comprehensive public health infrastructure New York has also stood at the forefront of formulating and implementing urban health policy Healing Gotham examines in depth how the city has responded to five serious contemporary public health threats childhood lead poisoning childhood asthma HIV AIDS obesity and West Nile virus Bruce F Berg examines the rise and incidence of each condition in the city while explaining why the array of primary tools utilized by urban policy makers including monitoring and surveillance education regulations and the direct provision of services have been successful in controlling public health problems He also argues that forces such as race and ethnicity

New York City's relationship to the state and federal government, the promotion of economic development and the availability of knowledge related to preventing, treating and managing illness all influence effective public health policy making. By contrasting these five particular cases, this exciting study allows scholars and students to compare public health policy through time and across type. It also helps policy makers understand how best to develop and implement effective public health strategies around the United States. *Medical Sciences - Volume I* B.P. Mansourian, S.M. Mahfouz, A.

Wojtezak, 2009-08-10 *Medical Sciences* is a component of *Encyclopedia of Biological Physiological and Health Sciences* in the global *Encyclopedia of Life Support Systems EOLSS* which is an integrated compendium of twenty one Encyclopedias. This 2 volume set contains several chapters each of size 5000-30000 words with perspectives, applications and extensive illustrations. It carries state of the art knowledge in the fields of Medical Sciences and is aimed by virtue of the several applications at the following five major target audiences: University and College Students, Educators, Professional

Practitioners, Research Personnel and Policy Analysts, Managers and Decision Makers and NGOs. *The Tyranny of Experts* William Easterly, 2014-03-04 In this bracingly iconoclastic book, *New York Times* Book Review, a renowned economics scholar breaks down the fight to end global poverty and the rights that poor individuals have had taken away for generations. In *The Tyranny of Experts*, renowned economist William Easterly examines our failing efforts to fight global poverty and argues that the expert approved top down approach to development has not only made little lasting progress but has proven a convenient rationale for decades of human rights violations perpetrated by colonialists, postcolonial dictators and US and UK foreign policymakers seeking autocratic allies. Demonstrating how our traditional antipoverty tactics have both trampled the freedom of the world's poor and suppressed a vital debate about alternative approaches to solving poverty, Easterly presents a devastating critique of the blighted record of authoritarian development. In this masterful work, Easterly reveals the fundamental errors inherent in our traditional approach and offers new principles for Western agencies and developing countries alike: principles that because they are predicated on respect for the rights of poor people, have the power to end global poverty once and for all. **MEDICAL AND HEALTH SCIENCES - Volume VIII** Osmo Otto Paivio Hanninen;
