

Neufert

Architects' Data

Fourth Edition

Neufert's Architects' Data is an essential reference for the initial design and planning of a building project. It provides, in one concise volume, the core information needed to form the framework for the more detailed design and planning of any building project. Organized largely by building type, it covers the full range of preliminary considerations, and with over 4200 diagrams it provides a mass of data on spatial requirements.

Most illustrations are dimensioned and each building type includes plans, sections, site layouts and design details. An extensive bibliography and a detailed set of metric/imperial conversion tables are included. Since it was first published in Germany in 1936, Ernst Neufert's handbook has been progressively revised and updated through 38 editions and many translations. This fourth English language edition is translated from the 38th German edition, and represents a major new edition for an international, English-speaking readership.

Reviews of the Previous Edition:

"Neufert's Architects' Data was the first book I bought when I started my studies in architecture. It was invaluable for me then and it is still a useful aid in my designs."

Cesar Pelli

"With this thorough revision Neufert has produced yet again an invaluable reference book."

Architects' Data Ernst Neufert, Peter Neufert, 2012-03-26 Neufert's Architects Data is an essential reference for the initial design and planning of a building project. It provides in one concise volume the core information needed to form the framework for the more detailed design and planning of any building project. Organised largely by building type, it covers the full range of preliminary considerations and with over 6200 diagrams it provides a mass of data on spatial requirements. Most illustrations are dimensioned and each building type includes plans, sections, site layouts and design details. An extensive bibliography and a detailed set of metric/imperial conversion tables are included. Since it was first published in Germany in 1936, Ernst Neufert's handbook has been progressively revised and updated through 39 editions and many translations. This fourth English language edition is translated from the 39th German edition and represents a major new edition for an international English speaking readership. Reviews of the Previous Edition: Neufert's Architects Data was the first book I bought when I started my studies in architecture. It was invaluable for me then and it is still a useful aid in my designs. Cesar Pelli. With this thorough rewrite, Neufert has produced yet again an invaluable reference book. The Architects Journal. **The Architect in Practice** David Chappell, Andrew Willis, 2013-02-05 The Architect in Practice was first published in 1952. Originally written by a quantity surveyor and an architect, it has remained through its nine editions a leading textbook used in the education of architects world wide. While the format of the book has developed, the message and philosophy remains the same as the original, to provide the student of architecture and the young practitioner with a readable guide to the profession, outlining an architect's duties to client and contractor, the key aspects of running a building contract and the essentials of management, finance and drawing office procedure. The tenth edition follows in that tradition. The authors, still an architect and a quantity surveyor, have brought the text fully up to date. Major revisions in this edition include: Revised sections on Planning and the Building Regulations; Changes to the education of architects in the UK have been detailed; Discussion of the new ARB Architects Code; Standards of Professional Conduct and Practice which came into force in January 2010; The commentary on the RIBA Standard Form for the Appointment of an Architect 1999 SFA 99 has been updated; The latest RIBA Standard Agreement 2010 S 10 A is now discussed; All references to JCT contracts have been updated to refer to the latest revisions of the 2005 suite of contracts; Now also includes reference to education registration and CPD requirements of the Royal Institute of the Architects of Ireland. The tenth edition of The Architect in Practice will continue to provide the guidance and advice all students and practising architects need in the course of their studies and in their profession. **Catalogue** Harvard University.
