Literature and Geography Emmanuelle Peraldo, 2016-01-14 In a period marked by the Spatial Turn time is not the main category of analysis any longer Space is It is now considered as a central metaphor and topos in literature and literary criticism has seized space as a new tool Similarly literature turns out to be an ideal field for geography This book examines the cross fertilization of geography and literature as disciplines languages and methodologies In the past two decades several methods of analysis focusing on the relationship and interconnectedness between literature and geography have flourished Literary cartography literary geography and geocriticism Westphal 2007 and Tally 2011 have their specificities but they all agree upon the omnipresence of space place and mapping at the core of analysis Other approaches like ecocriticism Buell 2001 and Garrard 2004 geopoetics White 1994 geography of literature Moretti 2000 studies of the inserted map Ljunberg 2012 and Pristnall and Cooper 2011 and narrative cartography have likewise drawn attention to space

Literature and Geography The Writing of Space Throughout History following an international conference in Lyon bringing together literary academics geographers cartographers and architects in order to discuss literature and geography as two practices of space shows that literature along with geography is perfectly valid to account for space Suggestions are offered here from all disciplines on how to take into account representations and discourses since texts including literary ones have become increasingly present in the analysis of geographers
