Die Gute Nachricht Das Neue Testament In Heutigem Deutsch:

Die gute Nachricht, 1971 Nordic Interpretations of the New Testament Louise Heklgard Bylund, René Falkenberg, Marianne Bjelland Kartzow, Kasper Bro Larsen, 2020-09-07 This volume brings together contributions from the ongoing conversation among New Testament scholars from the Nordic Countries namely Denmark Iceland Finland Norway and Sweden The aim is to challenge the New Testament texts and their interpretations but also to be challenged by these texts and interpretation i e how to read interpret and contextualize the impact of these texts and how to conceptualize the power and authority attributed to them As neighbours in peripheral Europe partly sharing language and history scholars of this region also aim to participate in the broader international discourse The fact that their common academic language is English begs the question whether many of the current essays could have been written in different settings since they do not explicitly reflect on contextual issues Or is this the case What characterizes that part of the world are social democracies with relatively high standards of living a strong protestant past but an increasing multicultural population public welfare systems and gender equality Public universities still have money and can prioritize mobility and internationalisation accordingly although few people live in the Nordic countries relatively many biblical scholars have roots there *Toward a Science of Translating?* Stefan Felber, 2025-03-27 Eugene A Nida is one of the pioneers and founders of modern translation theory coining the terms dynamic equivalence and formal equivalence and energetically promoting the former though in his latter years preferring the term functional equivalence Originally formulated for the Bible Translation efforts amongst people groups without the Bible Nida's theories of translation have also been widely influential in Translation Studies making this presentation of Eugene A Nida's life 1914-2011 and assessment of his works especially timely and significant Stefan Felber is a German Old Testament scholar former seminary professor and author of the German only *Wesen und Würde des Wortes Biblisch theologische Grundlagen für das Verständnis von Sprache und Kommunikation* The Nature and Dignity of the Word Biblical Theological Foundations for Understanding Language and Communication in *Zwischen Babel und Jerusalem Aspekte von Sprache und Übersetzung* among other works As such he is uniquely qualified to offer this fair minded and masterful yet critical evaluation of Nida's model of translation doing so from a rich variety of disciplines including exegesis theology philology and philosophies of language Whether one agrees or disagrees with either Nida or Felber I highly recommend this rigorous and wide ranging exposition for advancing informed dialogue and promoting further understanding and advances in Translation Studies Professor Tom McCormick Tyndale University College Toronto Although the theory of Dynamic or Functional Equivalence was the most widely used method in global Bible translation after the Second World War there has been no comprehensive study of its foundations and how it was developed by Eugene Nida Filling this gap is one of the great merits of Felber's study Felber while showing great respect for Nida critically evaluates Dynamic Equivalence from various perspectives exegetical theological philosophical and linguistic This multi dimensional nuanced approach provides the reader

with thought provoking and helpful insights that further the discussion in important ways Felber's study is a must read for all who deal with language and translation in theology and the church in Bible translation and mission Prof Dr Markus Zehnder Internationale Hochschule Bad Liebenzell Evangelische theologische Fakultät Leuven Ansgarskolen Kristiansand Stefan Felber's *Toward a Science of Translating* is a landmark study in Biblical Translation Theory focussing on Eugene Nida 1914-2011 who for many years was a central figure in the American Bible Society and the United Bible Societies Nida has been described as probably the world's leading scholar on translation and his theory of Dynamic or Functional Equivalence provided a leading paradigm for Bible translators for decades In this thorough analysis of his work and its reception Felber highlights a number of weaknesses as well as some strengths affiliated with Nida's theory promoting translation theory based on reader oriented thought for thought patterns rather than traditional source oriented analysis of textual form and content Felber's evaluation raises a critical question Are facets of the biblical text pertaining to biblical language and hermeneutics theology and the transcendent downplayed in Nida's addressee oriented approach to translation I hope this book will be widely read by translators biblical scholars and others interested in translation of the Bible Dr Tomas Bokedal Associate Professor of New Testament and Early Christianity NLA University College Norway Docent of New Testament Exegesis Lund University Sweden

took into account in its work Part three the most extensive section discusses the textual witnesses the different forms of the Hebrew text and the contribution of the ancient versions As his concluding program for a critical edition makes clear the groundbreaking work of Barth lemy and the HOTTP served as the basis for the new Biblia Hebraica Quinta which began publication in 2004 UBS undertook the HOTTP to offer Bible translators help in applying the results of textual criticism to their work but there is no doubt that many others will benefit from this work as well as the other volumes in the series Textual Criticism and the Translator
