Classroom Assessment What Teachers Need To Know 7th Edition:

Classroom Assessment W. James Popham, 2018-03-07 Jim Popham's widely popular Classroom Assessment shows teachers how to use classroom testing skillfully and formatively to dramatically increase their teaching effectiveness and make a difference in how well students learn. As in past editions, the author pays particular attention to the instructional payoffs of well-designed classroom tests and highlights the implications of testing on teaching throughout. In special But What Does This Have to Do with Teaching sections in each chapter, Decision Time vignettes present practical classroom problems and show readers actual decisions being made. Parent Talk features describe situations in which a teacher needs to explain something about assessment to parents and show what the author would say in that situation. And a lighter tone is established with cartoons to which readers can relate. The new Eighth Edition highlights the increasing importance of educational assessment in an era of common core state standards and teacher evaluations based on students' test scores, incorporates the Standards for Educational and Psychological testing guidelines throughout relevant sections, and includes a new section on instructionally diagnostic tests to help readers evaluate the merits of commercial or locally developed diagnostic assessment. The Power of Assessment in the Classroom Carla E. Förster, 2024-01-01 This textbook addresses the main assessment issues that teachers and educational institutions face in their daily work while providing practical tools to support actions and decisions in this area. The critical issues observed in the assessment practices are made visible, and specific guidelines and examples are given on how to carry out an effective and realistic classroom assessment within the school context. The book reveals evaluation elements that future and practicing teachers need to know about and can benefit from, such as the alignment between curriculum teaching and assessment, flexibility in the construction of instruments according to their purpose, effective feedback rubrics to evaluate performance, and the use of specification tables to make pedagogical decisions beyond the construction of the instruments.
