Community Visioning Programs Processes And Outcomes Community Development Research And Practice Series:

Community Visioning Programs Norman Walzer, Gisele Hamm, 2017-10-02 Communities have practiced strategic planning for decades using a variety of tools and programs based on the initial Take Charge programs of the early 1990s. These efforts generated a large amount of research regarding their effectiveness as well as ways to measure long term outcomes and other related issues in efforts to better understand the process of community change. This book provides contributions written by researchers and practitioners describing both visioning and other strategic planning efforts. The Great Recession challenged the future of many small and medium sized cities especially in non metropolitan areas renewing the interests of community leaders and elected officials in finding innovative ways to revitalize their local employment base and economic opportunities. Having access to a collection of best practices and successful approaches can greatly assist these practitioners in selecting strategies and techniques for use in their community efforts. The material in this book is especially useful because it includes both methodologies as well as case studies of how and why various approaches used in alternative cultural settings have succeeded. This book was originally published as a special issue of Community Development.

Knowledge Partnering for Community Development Robyn Eversole, 2014-10-17 Effective community development means that many different stakeholders have to work together: governments, development organizations and NGOs and most importantly the people they serve. Knowledge Partnering for Community Development teaches community development professionals how to mediate community needs and development agendas to make community based solutions for development challenges. Based on the newest research in community and global development, Eversole shows readers a strong research and theoretically based framework for understanding local development processes and gives them the skills to turn this into cutting edge practice. Each chapter features global case studies of innovative community state partnerships and practical application exercises and strategies for professionals looking to bring new approaches to their research. Knowledge Partnering for Community Development is essential for community workers and students of community development looking to bridge the gap between research insight and best practice between community actors. **Social**

Capital at the Community Level John M. Halstead, Steven C. Deller, 2015-04-24 In *Social Capital at the Community Level*, John Halstead and Steven Deller examine social capital formation beyond the individual level through a variety of disciplines: planning, economics, regional development, sociology as well as non traditional approaches like engineering and built environmental features. The notion of social capital in community and economic development has become a focus of intense interest for policy makers, practitioners and academics. The notion is that communities with higher levels of social capital, networks, trust and norms will prosper both economically and socially. In a practical sense, how do communities use the notion of social capital to build policies and strategies to move their community forward? Are all forms of social capital the same and do all have a positive influence on the community? To help gain insights into these fundamental questions, *Social Capital at the*

Community Level takes a holistic interdisciplinary or systems approach to thinking about the community. While those who study social capital will acknowledge the need for an interdisciplinary approach, most stay within their disciplinary silos. One could say there is strong bonding social capital within disciplines but little bridging social capital across disciplines. The contributors to *Social Capital at the Community Level* have made an attempt to build that bridging social capital. While disciplinary biases and research approaches are evident, there is significant overlap about how people with different disciplinary perspectives think about social capital and how it can be applied at the community level. This can be from neighborhoods addressing a localized issue to a global response to a natural disaster. This book is an invaluable resource for scholars, researchers, and policy makers of community and economic development as well as rural sociologists and planners looking to understand the opaque process of social capital formation in communities.

Arts and Community Change Max O. Stephenson Jr., Scott Tate, 2015-05-15. *Arts and Community Change: Exploring Cultural Development Policies, Practices, and Dilemmas* addresses the growing number of communities adopting arts and culture-based development methods to influence social change. Providing community workers and planners with strategies to develop arts policy that enriches communities and their residents, this collection critically examines the central tensions and complexities in arts policy, paying attention to issues of gentrification and stratification. Including a variety of case studies from across the United States and Canada, these success stories and best practice approaches across many media present strategies to design appropriate policy for unique populations. Edited by Max Stephenson Jr. and A. Scott Tate of Virginia Tech, *Arts and Community Change* presents 10 chapters from artistic and community leaders, essential reading for students and practitioners in economic development and arts management.

Community Owned Businesses Norman Walzer, 2021-07-19. This book analyses community-owned businesses in countries around the world to show successful approaches and important strategies to improve access to essential services in vastly different economic contexts. Through eleven chapters, authors from various countries use case studies and analyse findings in ways which can be applied to new development initiatives, including rural grocery store retention in Kansas, socially responsible community cooperatives in Italy, preserving pubs and shops in England and Wales, serving residents with special needs in Canada, and financing basic goods and services for aging populations in Taiwan, plus other examples. The chapters explore practices and approaches used in various locations to address concerns about loss of access to essential services, making clear that this approach to financing is useful in different scenarios. The chapters provide key insights suggesting that these approaches will be even more prevalent in the future and will be of interest to students, scholars, and community development practitioners around the world.

Innovative Measurement and Evaluation of Community Development Practices Norman Walzer, Jane Leonard, Mary Emery, 2017-10-02. Finding innovative and useful measurement practices for community development projects is gaining in importance as policymakers increase the demands for accountability. This book examines some of the latest efforts to document the effectiveness of local development efforts.

The types of documentation differ by types of project jurisdiction and country but they have a common focus of recognizing the importance of the Community Capitals framework. Public agencies in the past have often measured development successes by the number of jobs created and or amount of private investment forthcoming. However the impacts of community development reach much deeper than those indicators. Strengthening local decision making capacity is a common component of development efforts as is engaging populations that in the past have not been active in decision making. These and other considerations are explored in more detail by authors in this volume. Local policymakers and practitioners will be continually pressured to provide more documentation of outcomes and readers will gain considerable insights into alternative approaches that can be included in projects but can also see the common elements needed to create a solid measurement system. International insights are a special strength of the discussions in this book. This book was published as a special issue of Community Development.

Food & Fitness Community Partnerships Laurie Lachance, Laurie Carpenter, Mary Emery, Mia Luluquisen, 2018-02-02. This book describes many of the unique contributions of the Food Fitness program including a number of early successes drawing lessons from efforts to form and maintain partnerships and from the strategies employed to create structural change in communities. This important study introduces the Food and Fitness community partnerships and their work to increase access to healthy locally grown food and opportunities for physical activity in vulnerable communities across the United States. Established in 2007 and funded by the WK Kellogg Foundation the partnerships are increasing the capacity of communities to participate in policy and systems change to positively affect their health and well being. The material covered in the chapters provide an illustration of how funders grantees and partners can work together to create sustainable change at the neighborhood level to ensure that all children and families are able to thrive. A range of studies are looked at from the various initiatives funded nationwide to evaluation methods and results and an explanation of the role of philanthropy in community development from the viewpoint of the funders. This book was originally published as a special issue of Community Development.

Innovative Community Change Practices Norman Walzer, Sam Cordes, 2017-10-02. The national recession forced many communities to examine new and innovative ways to promote local economic development resulting in long term community changes. New techniques and approaches were used to identify available opportunities and programs which could take advantage of development opportunities. A common theme among the contributions to this book is a focus on building leadership capacity and several chapters discuss the successful practices which are aimed at bringing new leaders into local development efforts. Especially important are ways to identify youth and young adults and designing programs that bring them into active leadership roles within community development efforts. On a broader scale several authors present material regarding building local entrepreneurship capacity and recognizing that entrepreneurs at different stages in their development have different training and support needs. The discussions in this book will help local policymakers and development practitioners better understand the various

development techniques and find ways to build capacity within their community stimulating development This information will be especially useful for groups interested in engaging youth and populations who in the past have not been especially active in discussions about community and economic development This book was originally published as a special issue of Community Development
