Compact City A Plan For A Liveable Urban Environment:

Compact City George Bernard Dantzig, Thomas L. Saaty, 1973 Compact City George Bernard Dantzig, Thomas L. Saaty, 1973 Compact city is a nontechnical introductory study about the feasibility of building a city that makes more effective use of the vertical dimension and the time dimension through around the clock use of facilities than do present cities Back cover **The Compact City** Elizabeth Burton, Mike Jenks, Katie Williams, 2003-09-02 This book presents the latest thinking on the benefits and dangers of higher density urban living It offers diverse opinions and research from a wide range of disciplines and gives an insight into both the theoretical debate and the practical challenges surrounding the compact city Essential reading for anyone with an interest in sustainable urban development **Compact Cities and Sustainable Urban Development** Gert de Roo, Donald Miller, 2019-05-24 This title was first published in 2000 Encouraging even requiring higher density urban development is a major policy in the European Community and of Agenda 21 and a central principle of growth management programmes used by cities around the world This work takes a critical look at a number of claims made by proponents of this initiative seeking to answer whether indeed this strategy controls the spread of urban suburbs into open lands is acceptable to residents reduces trip lengths and encourages use of public transit improves efficiency in providing urban infrastructure and services and results in environmental improvements supporting higher quality of life in cities Compact City Thomas L. Saaty, We need to control nature by eliminating its capricious threats to our lives We do it best by not only making our living working sports and other leisure structures more accessible in space but also by minimizing and banishing congestions and the need for long times to commute to work or to access shopping malls sports and cultural activities With the threat of global warming and melting of the polar ice cap in the Antarctic low lying cities throughout the world are threatened with drowning under more than 150 feet of water What should we be thinking about insulating ourselves from natural threats like hurricanes and tsunamis and earthquakes Surprisingly enough the new design will eliminate one of the problems of poverty the lack of shelter **International Handbook of Urban Policy** H. S. Geyer, 2011 This important Handbook reveals that most urban growth takes place in the less developed world and much of it represents over urbanization that is urbanization in which most migrants cannot effectively compete for employment cannot find adequate shelter and do not have the means to feed themselves properly Yet compared to rural poverty urban poverty is widely regarded as the lesser of the two evils H S Geyer and his contributors highlight the enormous challenges posed by urbanization to decision makers at all levels of government This final volume in a series of three original reference works covers four broad themes including urban growth patterns spatial issues policy issues and urban growth determinants The chapters have been written not only for the advanced student and academics but also with undergraduate students in mind The Handbook will appeal to scholars and researchers interested in international urban development issues

Architecture and the Urban Environment Derek Thomas, 2007-06-01 This well illustrated text forms a critical appraisal of the place and direction of architecture and urban design in a new world order at the start of the 21st century The book defines architectural and environmental goals for the New Age by analysing recent contemporary work for its responsiveness to important social and environmental issues and comparing it to successful precedents in architecture It argues that this new sustainable approach to architecture should be recognised as a new development of mainstream architectural history This practical guide illustrates current social and natural resource issues to aid architects in their approach to future design Environmental economics is presented as a potential bridge over the divide between the expectations of the business sector and the concerns of environmental lobbies Through examples and case studies an accessible analysis of carefully researched data drawn from primary sources over four continents allows the author to outline the current urgency for architects and urban designers to respond with real commitment to current and future changing contexts This book expresses a holistic vision and proposes a value system in response to the diagnosis It includes sound architectural and environmental ethics end user involvement in the design process and technological advances aimed at sustainable resource use Includes international case studies from Europe North America the Developing world including South Africa South America and Central Asia

From Dichotomies to Dialogues Lei Qu, Machiel van Dorst, 2023-06-13 Urbanism is a way of thinking and acting needed for sustainable development urbanists are becoming inter and transdisciplinary bringing science technology and design into their field As the world is in a cascading of crises related to e g health energy food and water as well as issues of e g traffic housing and services integrated approaches become increasingly relevant as most of these challenges are related Having a holistic urbanism viewpoint is the path to resilience and sustainability Here we are not referring to a longer list of notions but particularly encouraging dialogues between possibly perceived conflicting discourses This book is the proceedings of the 14th IFoU conference a stepping stone towards a new culture of working together It includes papers in five tracks representing five types of debates over a set of dichotomies Urban rural Integration and Areas In Between The City is an Object and a City is in Transition Political Ecology and Adaptive and Transformative Framework Metropolization and the Right to the City Human centred and Nature based Approaches in Cities

China's New Urbanization Strategy China Development Research Foundation, 2013 Urbanization is one of the major challenges facing China Of China's 1.3 billion people around half still live in rural areas There has been huge migration from rural areas to cities in recent years a trend that is likely to continue strong for some time The strains that this vast migration puts on China's cities are enormous This book makes available for the English speaking reader the results of a large group of research projects undertaken by CDRF one of China's leading think tanks into the details of rural urban

migration the resulting urban growth and the problems associated with all this The book goes on to put forward a new strategy which aims to ensure that China's urbanization proceeds in an orderly manner and that people and their needs are put at the centre of the strategy Key parts of the strategy include that city clusters should become the main form of urbanization that these should be arranged geographically in a pattern of two horizontal lines and three vertical lines that industrial and employment structures should highlight regional features and diversity that urban public services should be more equitably distributed that there should be new forms of urbanization management and city governance to accelerate urbanization and ensure harmonious social development and that the whole process should be conducted in an ecological green way
