Companies And Communities Participating Without Being Sleazy:

Companies and Communities Dawn M. Foster, 2009-03-01 Companies and Communities is focused on helping your company get real business value out of participating in online communities and social media. This book contains practical advice and suggestions for how companies can engage with online communities and social media sites. It includes guiding principles, blogs, and blogging. Twitter, social networks, Facebook, and MySpace. Custom corporate communities, community management, and more.

Community, Competition and Citizen Science Anne Holohan, 2016-12-05 Voluntary distributed computing projects divide large computational tasks into small pieces of data or work that are sent out over the Internet to be processed by individual users who participate voluntarily in order to provide solutions that would ordinarily require investments of millions of dollars. This approach is contributing to the transformation of computationally heavy scientific research, opening up participation in science to interested lay people and greatly reducing the cost barriers to computation for financially challenged researchers. Drawing on face-to-face and online ethnographic survey and interview data with participants in distributed computing projects around the world, this book sheds light on the organizational and social structures of voluntary distributed computing projects, communities, and teams, with close attention to questions of motivation in projects that offer little or no traditional forms of reward, either financially or in terms of participants' careers. With its focus on non-market, non-hierarchical cooperation, this book is a case study of networked individuals around the world who are part of a new social production of information. A rich study of the transformative potential inherent in globalization and connectedness, Community, Competition and Citizen Science will appeal to sociologists and political scientists with interests in globalization, networks, and science and technology studies, together with scholars and students of media and communication and those working in relevant fields of computing, information systems, and scientific collaboration.

Sexy with No Boundaries Hidi Lee, 2020-12-31 From Hong Kong to Italy to Canada to United States, Hidi Lee believes that no matter where she works, she faces the same kind of person: the one that is confused and insecure of her own body. Having been a lingerie designer for 24 years, Lee believes this lack of confidence is due to the false body perception that is often implemented by the mass media. Lee argues against what she calls the old-school sexy, which she sees as prevalence of a curvy body or dressing provocatively. In *Sexy with no Boundaries: Discover the Art of being Sexy Mentally, Physically and Professionally*, she promotes what she labels *Sexy in the New Millennium*. Being sexy isn't just about skin-deep beauty; it's about aligning the physical beauty with inner qualities such as mind-set, happiness, self-love, sense of humor, and confidence to complete what is the true meaning of sexy from the inside and out. Let her show you how. She believes that this one day is approaching us sooner than anybody thinks. Now is the time to speak for love, generosity, kindness, integrity, and peace. And her dream is contagious. Have you ever stood in front of your mirror and completely fall in love with what you see? Lee and her contributors join forces to inspire individuals to realize that sexy is size-blind, age-blind, beauty-blind, gender-blind, religious-

blind We are all sexy and beautiful in our own way Her ultimate goal is to turn the once confused and insecure individual to receive massive success filled with confidence and sexiness
