among German corporations during the 1990s so that by today far over 100 German listed companies grant stock option plans to their employees Based on recent research the average German CEO Vorstandsvorsitzender receives approximately 10% of his salary in form of stock options The ongoing globalisations of business practises as well as the boom of the Neuer Markt have been key drivers of this development Initially from an economic perspective the increasing importance of stock option plans in the compensation of senior managers has to be welcomed Assuming that senior managers through their actions have the ability to influence the stock price of their companies stock options represent a performance based type of pay that improves the incentives to senior managers to create additional shareholder value However this perspective often neglects the potential costs created by such an incentive instrument Several research studies suggest that companies in some cases generate additional costs through the granting of stock options that can exceed the benefits created by their incentive effect *Quadrennial Review of Military Compensation* United States. Pay Comparability System and Related Matters United States. Congress. House. Committee on Post Office and Civil Service. Subcommittee on Civil Service,1986 **Explaining Executive Pay** Lukas Hengartner,2007-12-31

The idea of studying executive pay was born in a lecture on option valuation in spring 2002 at the Norwegian School of Economics and Business Administration NHH At that time I started wondering how companies that had granted large amounts of stock options to their executives would react to the sharp decreases in share prices that could be observed since 2000 Based on this interest I wrote my NHH master thesis about Employee stock options and falling share prices investigating a sample of Norwegian IT companies These companies were especially likely to both have granted substantial amounts of options and suffered from severe declines in share prices The topic of executive pay continued to attract my interest mainly because I felt that it offered opportunities to make a real contribution to academic researchers and policy makers alike In summer 2002 I

wrote my master thesis at the University of St Gallen HSG I investigated the determinants of executive stock option plan adoptions of Swiss sto listed companies Major results were that both large outside shareholders and CEO duality influenced whether companies would adopt stock option plans At that time very little information about executive pay was disclosed in Switzerland However the Swiss Stock Exchange SWX issued new listing guidelines that required companies to disclose detailed information on Corporate Governance starting from the annual report 2002 to be published in 2003
