Complaint Management The Heart Of Crm:

Complaint Management Bernd Stauss, Wolfgang Seidel, 2004 When companies implement Customer Relationship Management CRM they often find that their number of complaints shoots up Bernd Stauss and Wolfgang Seidel candidly explain that often companies actively discourage complaints with processes that are so barrier ridden that consumers switch to another company's products rather than negotiate the maze As an alternative Stauss and Seidel present a CRM based complaint management system that for enlightened corporate citizens can become a strategic asset and even an indirect revenue source Occasionally they get a little carried away with their consultantese and terms like process owner and complaint owner Nevertheless the seven page complaint management checklist at the end of the book is particularly valuable getAbstract.com strongly recommends this book to CRM managers who want to know what their customers really think

Complaint Management and Internal Marketing Malte Kempen, 2009-01-05 Inhaltsangabe Introduction The first chapter gives an introduction into the topic and explains how the whole work is structured before the key subjects in chapter two will be discussed Okay Sir I will put you through to someone else Does this sound familiar Trying to switch to a different contract with a cell phone operator but nobody seems to be qualified to handle a request Dissatisfaction arises and the customer would like to report his problem On the one hand the customer experiences a breakdown in service and on the other hand a second disappointment may follow if a service provider fails to handle the grievance after it is stated The question arises as to why complaint handling is important nowadays Complaint handling is not as selfless an act by a company as it may seem A complaint is the cheapest most honest and most qualitative form of management consulting there is according to market research into sales force by Pawlik Sales Consultants AG Companies should not be afraid to face feedback and complaints According to the Treasury Board of Canada Research suggests that relatively few dissatisfied clients bother to complain As a result every complaint received may provide a window into a much larger pool of dissatisfaction By dealing with the causes of complaints the organization can further reduce both the number of complaints and dissatisfaction with its program delivery or service Complaint management is a tool to prevent the migration of customers to competitors and more and more companies understand that simply recruiting new customers is not sufficient As a consequence intensification of defensive marketing in contrast to offensive marketing actions becomes more interesting to a company The aim of defensive marketing should be the development of long lasting customer relations For example Volvo Saab the Swedish automobile manufacturer estimates that the cost of generating new customers is three times the cost of retaining an existing customer Satisfactory complaint management can create satisfied customers The key figure mediating between a company and a customer with a complaint is of course the employee of the service organization The role and performance of the employee will determine the success of a complaint handling process and the adequate service recovery In order to be able to fulfil this goal employees need to undergo training Furthermore the management needs to develop a

corporate *Effective Complaint Management* Bernd Stauss, Wolfgang Seidel, 2019-01-31 This practice and research based book caters to the needs of executive managers who see customer satisfaction as their primary goal The authors identify the need for an effective complaint management strategy that prevents the loss of dissatisfied customers Dissatisfied customers are at risk of migrating accordingly neglecting professional complaint management poses a considerable threat to customer relationships sales and profits The book offers a comprehensive management concept which emphasizes direct contact with the complainant by employing complaint stimulation acceptance processing and reaction Further it discusses the relevant backstage tasks involved in using complaint information to achieve quality improvements and cost reductions through complaint analysis controlling and reporting

Total Relationship Marketing Evert Gummesson, 2011-01-05 This

third edition of Total Relationship Marketing confirms it as a classic text on the subject of relationship marketing and CRM areas which have become accepted and debated parts of marketing but are currently undergoing dramatic change. A major contribution to marketing thought internationally, this seminal title presents a powerful in-depth analysis of relational approaches to marketing where the three words relationships, networks and interaction are king. The book effects a dramatic shift in the fundamentals of marketing thought with the author's refined model of thirty relationships, the 30Rs, presenting a sophisticated and cogent challenge to the traditional 4Ps schema. Previous editions were widely praised as breakthrough texts in the field, combining incisive and searching analysis with an accessible and pragmatic approach to putting the theory to work. This third edition is the first book on relationship marketing and CRM to integrate the ongoing evolution in marketing through the service-dominant logic, lean consumption and the customer's value chain, the augmented role of the customer in value creation, the increasing importance of customer-to-customer (C2C) interaction, network-based many-to-many marketing and marketing accountability and metrics. It addresses both the high-tech information technology aspects of marketing and the high-touch human aspects. Further customer-centricity is suggested to be broadened to balanced centricity, a trade-off between the needs of all stakeholders of a network of relationships. Examples, cases, concepts and references have been updated. Highly informative, practical in style and packed with illustrations from real companies, Total Relationship Marketing is an essential resource for all serious marketing practitioners as well as undergraduate and postgraduate students.

A Complaint Is a Gift Janelle Barlow, Claus Møller, 2008-08-18. A customer complaint is the most valuable source of feedback you can receive to improve your business. This new and improved second edition guides you through responding to complaints, taking advantage of when complaints become personal and how you too can complain constructively and effectively. The first edition of *A Complaint Is a Gift* introduced the revolutionary notion that customer complaints are not annoyances to be dodged, denied or buried but are instead valuable pieces of feedback. In fact, they're your best bargain in market research. Customer complaints can give businesses a wake-up call when they're not achieving their fundamental purpose: meeting customer needs. Complaints provide a feedback mechanism that can help organizations rapidly and inexpensively strengthen products, service style and market focus. Most importantly, complaints create a moment of truth when a customer who is deciding whether to return can be made even more loyal. Using numerous real-life examples, authors Janelle Barlow and Claus Møller show precisely how to handle complaints in a way that brings benefit to your organization and satisfaction to your customers even when you have to say no. The second edition features two brand-new chapters on receiving and responding to complaints online, a new section on how to deal with and take advantage of complaints that are directed at you personally and turning the tables, a section on how you can complain constructively and effectively. And throughout the text has been heavily revised with a wealth of new examples, tools and strategies.
