

Credit Rating Agencies

- A company that assigns credit ratings for issuers of debt securities such as bonds.
- Makes it easier for investors to get an idea of the credit risk that they are taking on.
- CRA's do thorough research of a company's current financial position and future prospects, from which they assign a rating.
- The higher the rating the more credit-worthy the company's debt instruments are.
- The lower the credit rating the more risky a company's debt securities are, meaning that investors will demand higher interest rates to invest. This will make debt funding more expensive.

the Credit Rating Agencies Daniel Cash, 2018-08-06 This book examines the transgressions of the credit rating agencies before during and after the recent financial crisis It proposes that by restricting the agencies ability to offer ancillary services there stands the opportunity to limit in an achievable and practical manner the potentially negative effect that the Big Three rating agencies Standard Poor s Moody s and Fitch may have upon the financial sector and society moreover The book

contains an extensive and in depth discussion about how the agencies ascended to their current position why they were able to do so and ultimately their behaviour once their position was cemented This work offers a new framework for the reader to follow suggesting that investors issuers and the state have a desired version of the agencies in their thinking and operate upon that basis when in fact those imagined agencies do not exist as demonstrated by the actual conduct of the agencies The book primarily aims to uncover this divergence and reveal the real credit rating agencies and then on that basis propose a real and potentially achievable reform to limit the negative effects that result from poor performance in this Industry It addresses the topics with regard to financial regulation and the financial crisis and will be of interest to legal scholars interested in the intersection between business and the law as well as researchers academics policymakers industry and professional associations and students in the fields of corporate law banking and finance law financial regulation corporate governance and corporate finance

The Foundations and Future of Financial Regulation Mads Andenas, Iris H-Y Chiu, 2013-11-20 Financial regulation has entered into a new era as many foundational economic theories and policies supporting the existing infrastructure have been and are being questioned following the financial crisis Goodhart et al s

seminal monograph *Financial Regulation: Why, How and Where Now* (Routledge, 1998) took stock of the extent of financial innovation and the maturity of the financial services industry at that time and mapped out a new regulatory roadmap. This book offers a timely exploration of the 'Why, How and Where Now' of financial regulation in the aftermath of the crisis in order to map out the future trajectory of financial regulation in an age where financial stability is being emphasised as a key regulatory objective. The book is split into four sections: the objectives and regulatory landscape of financial regulation; the regulatory regime for investor protection; the regulatory regime for financial institutional safety and soundness; and macro-prudential regulation. The discussion ranges from theoretical and policy perspectives to comprehensive and critical consideration of financial regulation in the specifics. The focus of the book is on the substantive regulation of the UK and the EU, as critical examination is made of the unravelling and the future of financial regulation with comparative insights offered where relevant, especially from the US. Running throughout the book is consideration of the relationship between financial regulation, financial stability and the responsibility of various actors in governance. This book offers an important contribution to continuing reflections on the role of financial regulation, market discipline and corporate responsibility in the financial sector and upon the roles of regulatory authorities, markets and firms in ensuring the financial health and security of all in the future.
