Community Projects As Social Activism From Direct Action To Direct Services:

Community Projects as Social Activism Benjamin Shepard, 2014-07-17 Community Projects as Social Activism From Direct Action to Direct Services by Benjamin Shepard is an engaging and accessible work that will get today's students excited about the very real prospect of achieving lasting positive change within their communities. It outlines a distinct approach to community practice born out of the intersection among social movements, day to day organizing, and the lessons of five decades of community change practices. This invaluable resource is a must have for anyone involved in community organization, community health, and community activism practice, research, and policy. **The Everyday Politics of Food**

Co-ops Celia Plender, 2025-05-01 National politics has a significant impact on organizing and accessing community welfare. This book engages with notions of everyday politics within two London-based food co-ops emerging from different political environments and ideologies. It provides a careful and engaging examination of the experiences of political and economic change in Austerity Britain, revealing how national politics came to punctuate everyday lives within the co-ops. It highlights the political resonances that practices of care aid and community organizing came to have within the food co-ops at a time of rapid welfare withdrawal, as well as the tensions between more radical and neoliberal imaginaries that played out within them. The CQ Press Guide to Urban Politics and Policy in the United States Christine Kelleher Palus, Richardson

Dilworth, 2016-02-11 The CQ Press Guide to Urban Politics and Policy in the United States will bring the CQ Press reference guide approach to topics in urban politics and policy in the United States. If the old adage that all politics is local is even partially true, then cities are important centers for political activity and for the delivery of public goods and services. U.S. cities are diverse in terms of their political and economic development, demographic makeup, governance structures, and public policies. Yet there are some durable patterns across American cities too. Despite differences in governance and/or geographic size, most cities face similar challenges in the management of public finances, the administration of public safety and education. And all U.S. cities have a similar legal status within the federal system. This reference guide will help students understand how American cities from old to new have developed over time. Part I: how the various city governance structures allocate power across city officials and agencies. Part II: how civic and social forces interact with the organs of city government and organize to win control over these organs and/or their policy outputs. Part III: and what patterns of public goods and services cities produce for their residents. Part IV: The thematic and narrative structure allows students to dip into a topic in urban politics for deeper historical and comparative context than would be possible in either an A to Z encyclopedia entry or in an urban studies course text. **FEATURES** Approximately 40 chapters organized in major thematic parts in one volume available in both print and electronic formats. Front matter includes an Introduction by the Editors along with biographical backgrounds about the Editors and the Contributing Authors. Back matter includes a compilation of relevant topical data or tabular presentation of major historical developments, population growth, size of city budgets, etc. or historical

figures e g mayors a bibliographic essay and a detailed index Sidebars are provided throughout and chapters conclude with References Further Readings and Cross References to related chapters as links in the e version This Guide is a valuable reference on the topics in urban politics and policy in the United States The thematic and narrative structure allows researchers to dip into a topic in urban politics for a deeper historical and comparative context than would be possible in either an A to Z encyclopedia entry or in an urban studies course text

The Twenty-first Century African American Novel and the Critique of Whiteness in Everyday Life E. Lâle Demirtürk, 2016-05-25 This book examines the post 9 11 African American novels developing a new critical discourse on everyday discursive practices of whiteness The critique of everyday life in the racial context of post 9 11 American society is important in considering diverse forms of the lived experiences and subjectivities of black people in the novels They help us see that African American representations of the city have political significance in that the neo urban novel explores the possibility of a black dialogic communication to build a transformative social change Since the real power of Whiteness lies in its discursive power the book reveals the urgency to understand not only how whiteness works in everyday life in American society But it also explores how to cultivate new possibilities of configuring and performing Blackness differently as a response to the post 9 11 configurations of the culture of fear to produce new ways of interactional social relations that can eventually open up the space of critical awareness for white people to work against rather than reinforce discursive practices of White supremacy in everyday life This book explores how the multiple subjectivities and transformative acts of blackness can offer ways of subverting the discursive power of the white embodied practices What defines post 9 11 America as a nation that is consumed by the fear of racialized terrorists is its roots in the fear of uncontrollable Blackness as excess and ominous threat in the domestic terrain through which the ideology of White supremacy has constructed for governing through Whiteness African American urban novels published in the twenty first century respond to the discursive power of normative Whiteness that regulates black bodies selves and lives This book demonstrates how black people contest white dominant social spaces as sites of black criminality and exclusion in an attempt to re signify them as the sites of black transformative change through personal and grassroots activism through their performativity of Blackness as an agential identity formation in their interpersonal urban social encounters with white people Hence the vulnerable spaces of Whiteness in interracial urban encounters as it pervasively addresses those moments of transformative change enacted by Black characters in the face of the discursive practices of whiteness in the everyday life

These novels celebrate multifarious representations of black individuals who are capable of using their agency to subvert White discursive power in finding ways in their personal and grassroots activism to transform the culture of fear that locates Blackness as such in an attempt to make a difference in the American society at large
