Community Organizing And Community Building For Health

Mckenzie,R. R. Pinger,Denise Seabert

Community Organizing And Community Building For Health:

Community Organizing and Community Building for Health Meredith Minkler, 2005 **Community Organizing and Community Building for Health and Social Equity, 4th Edition** Meredith Minkler, Patricia Wakimoto, 2021-12-10

The fourth edition of *Community Organizing and Community Building for Health and Social Equity* provides both classic and recent contributions to the field with a special accent on how these approaches can contribute to health and social equity. The 23 chapters offer conceptual frameworks, skill building, and case studies in areas like coalition building, organizing by and with women of color, community assessment, and the power of the arts, the Internet, social media, and policy and media advocacy in such work. The use of participatory evaluation and strategies and tips on fundraising for community organizing also are presented, as are the ethical challenges that can arise in this work and helpful tools for anticipating and addressing them. Also included are study questions for use in the classroom. Many of the book's contributors are leaders in their academic fields, from public health and social work to community psychology and urban and regional planning and to social and political science. One author was the 44th president of the United States himself, a former community organizer in Chicago who reflects on his earlier vocation and its importance. Other contributors are inspiring community leaders whose work on the ground and in partnership with us outsiders highlights both the power of collaboration and the cultural humility and other skills required to do it well. Throughout this book, and particularly in the case studies and examples shared, the role of context is critical and never far from view. Included here, most recently, are the horrific and continuing toll of the COVID-19 pandemic and a long overdue yet still greatly circumscribed national reckoning with systemic racism in the aftermath of the brutal police killing of yet another unarmed Black person, and then another and another seemingly without end. In many chapters, the authors highlight different facets of the Black Lives Matter movement that took on new life across the country and the world in response to these atrocities. In other chapters, the existential threat of climate change and grave threats to democracy also are underscored. Community Organizing and Community Building for Health and Welfare Meredith Minkler, 2012-07-16

The third edition of *Community Organizing and Community Building for Health and Welfare* provides new and more established ways to approach community building and organizing, from collaborating with communities on assessment and issue selection to using the power of coalition building, media advocacy, and social media to enhance the effectiveness of such work. With a strong emphasis on cultural relevance and humility, this collection offers a wealth of case studies in areas ranging from childhood obesity to immigrant worker rights to health care reform. A tool kit of appendixes includes guidelines for assessing coalition effectiveness, exercises for critical reflection on our own power and privilege, and training tools such as policy bingo.

From former organizer and now President Barack Obama to academics and professionals in the fields of public health social work urban planning and community psychology the book offers a comprehensive vision and on the ground examples of the many ways community building and organizing can help us address some of the most intractable health and social problems of our times Dr Minkler s course syllabus Although Dr Minkler has changed the order of some chapters in the syllabus to accommodate guest speakers and help students prep for the midterm assignment she uses she arranged the actual book layout in a way that should flow quite naturally if instructors wish to use it in the order in which chapters appear
