

Comparing and Scaling Practice Answers

Investigation 1 Additional Practice

- If you add up the numbers of years for all the activities, you get a lifetime of approximately 73 years.
 - More time is spent sleeping than watching TV. The ratio is approximately 2 to 1.
 - 2 times
 - sleeping: $24\frac{1}{2}$ hours out of 73 hours, or about 34%; work or school: $13\frac{1}{2}$ hours out of 73 hours, or about 18%
 - 13 out of 73 is about 12 out of 72, or $\frac{1}{6}$; $9\frac{1}{2}$ out of 73 is about 9 out of 72, or $\frac{1}{8}$.
 - Answers will vary.
- The percent is found from the ratio of the weight of the body part to the total body weight of 152 pounds: head is 7%, neck and trunk are 46%, arms are 11%, hands are 2%, legs are 31%, and feet are 3%.
 - To determine the size of the sections, students must determine percents of 360 degrees.
 - The neck, trunk, and legs account for 77% of the total body weight.
- $756 \times 0.29 = 219$
 - $756 \times 0.37 = 280$
 - The percents don't add to 100% because the three groups are not necessarily exclusive. For example, a student might take the bus and play in the band. Because the percents add to more than 100%, there must be some overlap between the groups of students who participate in sports, play in the band, and take the bus.
- There are 30 students ($16 + 10 + 4$), and $10/30 = 33\frac{1}{3}\%$ of the students are wearing boots.
 - If we assume that the ratio of students in Ms. Yadav's class wearing boots is the same as the ratio of students in the entire school wearing boots, then an estimate would be $33\frac{1}{3}\%$ of 1,006, or 335 students.

- The total number of endangered species is $640 + 61 + 494 = 1,195$. Of these, 494 are found only in foreign countries. This is $\frac{494}{1,195}$, or about $\frac{5}{12}$.
 - 35 times more endangered plant species in the United States than in foreign countries; species in U.S.: $378 + 10 = 388$; species in foreign countries: $10 + 1 = 11$; 388 is about 35 times 11.
 - About 32%. $262 \div 816 = 0.321784314$
 - (Animals) $378 : 262$ (378 to 262) and (Plants) $1 : 493$ (1 to 493)
 - 41

Skill: Writing Ratios

- Sample answers:
 - 3 hearts : 4 diamonds;
4 diamonds : 7 shapes; 3 hearts : 7 shapes
 - 3 pencils : 2 pens; 2 pens : 3 pencils;
3 pencils : 5 writing implements
 - $\frac{7}{8}$; 0.88
 - $\frac{8}{9}$; 1.14
 - $\frac{7}{15}$; 0.47
 - $\frac{8}{15}$; 0.53
 - 10 : 12; or 5 : 6
 - 39 : 34
 - 4 yellow marbles

Skill: Ratios and Fractions

Investigation 2 Additional Practice

- 75 minutes; Adding 20 customers would increase the number of customers by one-half, so it would increase his time by about one-half.
 - It will take Bill $\frac{50}{40} \times 50 = 37.5$ minutes to deliver the Sunday papers.

Comparing and Scaling Glenda Lappan, 1998 **Large-Scale Knowledge Resources. Construction and Application** Takenobu Tokunaga, Antonio Ortega, 2008-02-08 At the start of the 21st century we are now well on the way towards a knowledge intensive society in which knowledge plays ever more important roles. Thus research interest should inevitably shift from information to knowledge with the problems of building, organizing, maintaining and utilizing knowledge coming central issues in a wide variety of fields. The 21st Century COE program Framework for Systematization and Application of Large scale Knowledge sources COE LKR conducted by the Tokyo Institute of Technology is one of several early attempts worldwide to address these important issues. Inspired by this project LKR2008 aimed at bringing together diverse contributions in cognitive science, computer science, education and linguistics to explore design, construction, extension, maintenance, validation and application of knowledge. Responding to our call for papers we received 38 submissions from a variety of research areas. Each paper was reviewed by three Program Committee members. Since we were aiming at an interdisciplinary conference covering a wide range of topics concerning large scale knowledge resources LKR each paper was assigned a reviewer from a topic area outside the main thrust of the paper. This reviewer was asked to assess whether the authors described the motivation and importance of their work in a comprehensible manner even for readers in other research areas. Following a rigorous reviewing process we accepted 14 regular papers and 12 poster papers.

The forbid/allow asymmetry Bregje Holleman,2021-09-13 Questionnaires are widely used in the social sciences and very often survey data form the basis for governmental and commercial planning or evaluation Yet the quality of survey data is not attested to since a large variety of factors in the language use situation prove to influence the answers unintentionally The forbid allow asymmetry is a well known example of this when respondents are asked whether something should be forbidden about 50% may answer yes forbid whereas an equivalent question phrased with the verb to allow could well cause up to 75% of the respondents to answer no it should not be allowed Which question wording is preferable to measure respondents true attitudes Only when we know why the answers differ can we decide on that This book is the first to apply a systematic cognitive approach to describe the causes of the forbid allow asymmetry The question answering process is unravelled by a variety of experiments and meta analytic techniques Analyses reveal that the difference in question wording does not prompt respondents to retrieve different attitudes Instead the asymmetry reflects that the question wording causes the response options to be used differently Because of the qualifying dimensions in the question text the meanings of yes and no change as well as the cognitive distance between them This study sheds a different light on processes of question answering and text interpretation Furthermore practical advice on questionnaire design and on the interpretation of survey data is given on the basis of these new insights

Traffic and Transport

Psychology Geoffrey Underwood, 2005-06-09 Just as our transport systems become more and more important to our economic and social well being so they become more and more crowded and more at risk from congestion disruption and collapse Technology and engineering can provide part of the solution but the complete solution will need to take account of the behaviour of the users of the transport networks The role of psychologists in this is to understand how people make decisions about the alternative modes of transport and about the alternative routes to their destinations to understand how novice and other vulnerable users can develop safe and effective behaviours how competent users can operate within the transport system optimally and within their perceptual and cognitive limitations The contributions to this volume address these issues of how the use of our transport systems can be improved by taking into account knowledge of the behaviour of the people who use the systems Topics discussed include driver training and licensing driver impairment road user attitudes and behaviour enforcement and behaviour change driver support systems and the psychology of mobility and transport mode choice This work will be of value not only to psychologists but to all transport professionals interested in the application of psychology to traffic
