Creative Disruption Technology Strategy And The Future Of The Global Defense Industry:

CREATIVE DISRUPTION: TECHNOLOGY, STRATEGY AND THE FUTURE OF THE GLOBAL DEFENSE

INDUSTRY. Ben FitzGerald, 2022 *The Handbook of European Defence Policies and Armed Forces* Hugo Meijer, Marco Wyss, 2018-06-22 The armed forces of Europe have undergone a dramatic transformation since the collapse of the Soviet Union The Handbook of European Defence Policies and Armed Forces provides the first comprehensive analysis of national security and defence policies strategies doctrines capabilities and military operations as well as the alliances and partnerships of European armed forces in response to the security challenges Europe has faced since the end of the cold war A truly cross European comparison of the evolution of national defence policies and armed forces remains a notable blind spot in the existing literature The Handbook of European Defence Policies and Armed Forces aims to fill this gap with fifty one contributions on European defence and international security from around the world The six parts focus on country based assessments of the evolution of the national defence policies of Europe s major medium and lesser powers since the end of the cold war the alliances and security partnerships developed by European states to cooperate in the provision of national security the security challenges faced by European states and their armed forces ranging from interstate through intra state and transnational the national security strategies and doctrines developed in response to these challenges the military capabilities and the underlying defence and technological industrial base brought to bear to support national strategies and doctrines and finally the national or multilateral military operations by European armed forces The contributions to The Handbook collectively demonstrate the fruitfulness of giving analytical precedence back to the comparative study of national defence policies and armed forces across Europe

Emerging Strategies in Defense

Acquisitions and Military Procurement Burgess, Kevin, Antill, Peter, 2016-07-22 Military and defense organizations are a vital component to any nation In order to maintain the standards of these sectors new procedures and practices must be implemented Emerging Strategies in Defense Acquisitions and Military Procurement is a pivotal reference source for the latest scholarly research on the present state of defense organizations examining reforms and solutions necessary to overcome current limitations and make vast improvements to their infrastructure Highlighting methodologies and theoretical foundations that promote more effective practices in defense acquisition this book is ideally designed for academicians practitioners researchers upper level students and professionals engaged in defense industries

Routledge Handbook of

Naval Strategy and Security Joachim Krause, Sebastian Bruns, 2016-03-17 This new handbook provides a comprehensive overview of the issues facing naval strategy and security in the twenty first century Featuring contributions from some of the world s premier researchers and practitioners in the field of naval strategy and security this handbook covers naval security issues in diverse regions of the world from the Indian Ocean and the Mediterranean to the Arctic and the piracy prone waters off East Africa s coast It outlines major policy challenges arising from competing claims transnational organized crime and

maritime terrorism and details national and alliance reactions to these problems While this volume provides detailed analyses on operational judicial and legislative consequences that contemporary maritime security threats pose it also places a specific emphasis on naval strategy With a public very much focused on the softer constabulary roles naval forces play such as humanitarian assistance disaster relief naval diplomacy maintenance of good order at sea the overarching hard power role of navies has been pushed into the background In fact navies and seapower have been notably absent from many recent academic discussions and deliberations of maritime security This handbook provides a much desired addition to the literature for researchers and analysts in the social sciences on the relationship between security policy and military means on land and from the sea It comprehensively explains the state of naval security in this maritime century and the role of naval forces in it This book will be of much interest to students of naval security and naval strategy security studies and IR as well as practitioners in the field

Securing U.S. Innovation Darren E. Tromblay, Robert G. Spelbrink, 2016-09-08 As experienced by the United States competition has played out in three distinct types of threat activity sabotage the destruction of capabilities espionage the theft of specific capabilities and defection the carrying of knowledge out of the country Today the changing innovation environment has created new challenges Significant advances are being made in start ups as well as larger companies who no longer rely on U S government contracts Not only does this place a key element of national power in the hands of the private sector but it often leaves Washington at an informational disadvantage in understanding technologies This book analyzes these concepts from the perspective of the United States experience in the field of innovation security Historical and recent examples illustrate the threats to innovation the various approaches to mitigating them and how the evolution of the innovative process now requires rethinking how the United States can benefit from and preserve its cutting edge human capital

Arming America through the Centuries Benjamin Franklin Cooling, 2022-09-29 While many associate the concept commonly referred to as the military industrial complex with President Dwight D Eisenhower s 1961 farewell address the roots of it existed two hundred years earlier This concept as Benjamin Franklin Cooling writes was part of historical lore as a burgeoning American nation discovered the inextricable relationship between arms and the State In Arming America through the Centuries Cooling examines the origins and development of the military industrial complex MIC over the course of American history He argues that the evolution of America s military industrial business political experience is the basis for a contemporary American Sparta Cooling explores the influence of industry on security the increasing prevalence of outsourcing ever present economic and political influence and the evolving nature of modern warfare He connects the budding military industrial relations of the colonial era and Industrial Revolution to their formal interdependence during the Cold War down to the present day resurrection of Great Power competition Across eight chronological chapters Cooling weaves together threads of industry finance privatization appropriations and technology to create a rich historical tapestry of US national defense in one comprehensive volume Integrating information from both

recent works as well as canonical older sources Cooling's ambitious single volume synthesis is a uniquely accessible and illuminating survey not only for scholars and policymakers but for students and general readers as well *Defence Industrial Cooperation in the European Union* Daniel Fiott, 2019-03-28 This book provides an empirical understanding of how EU level defence industrial cooperation functions in practice Using the Liberal Intergovernmental theoretical model the book argues that while national economic preferences are an essential factor of government interests they only explain part of the dynamic that leads to the development of defence industrial policy at EU level Moving beyond a simple adumbration of economic preferences it shows how the EU's institutional framework and corpus of law are used by governments to reaffirm their position as the ultimate arbiter and promoter of national economic preferences in the defence industrial sector To this end the work asks why and how EU member state governments European defence firms and EU institutions developed EU level defence industrial policy between 2003 and 2009 The book also analyses significant policy developments including the establishment of a European Defence Agency and two EU Directives on equipment transfers and defence procurement This book will be of much interest to students of EU policy defence studies security studies and International Relations in general
