Creative Industries In China Art Design And Media:

Creative Industries in China Michael Keane, 2013-05-06 Creative industries in China provides a fresh account of China's emerging commercial cultural sector. The author shows how developments in Chinese art design and media industries are reflected in policy, in market activity and grassroots participation. Never has the attraction of being a media producer, an artist or a designer in China been so enticing. National and regional governments offer financial incentives; consumption of cultural goods and services has increased; creative workers from Europe, North America and Asia are moving to Chinese cities; culture is increasingly positioned as a pillar industry. But what does this mean for our understanding of Chinese society? Can culture be industrialised following the low cost model of China's manufacturing economy? Is the national government really committed to social liberalisation? This engaging book is a valuable resource for students and scholars interested in social change in China. It draws on leading Chinese scholarship together with insights from global media studies, economic geography and cultural studies.

How Creativity is Changing China Li Wuwei, 2011-09-30 This book is available as open access through the Bloomsbury Open Access programme and is available on www.bloomsburycollections.com. The question Professor Li Wuwei investigates is not whether creativity is changing China, but how creativity is changing China. The outcome will have a profound impact on how China develops and its economic role in the world. Creative industries maintain and protect historical and cultural heritage, improve cultural capital and foster communities, as well as individual creativity. This leads to the improvement of cultural assets of cities, the establishment of city brands and identity, the promotion of the creative economy and overall economic and social development. In this context, creativity is changing China forever.
