Food Plant Design Antonio Lopez-Gomez, Gustavo V. Barbosa-Canovas, 2005-05-06 Although chemical engineering and food technology are subject areas closely related to food processing systems and food plant design coverage of the design of food plants is often sporadic and inadequately addressed in food technology and engineering books Some books have attempted to treat food engineering from this dual point of view but most have not achieved balanced coverage of the two Focusing on food processing rather than chemical plants Food Plant Design presents precise design details with photos and drawings of different types of food processing plants including food processing systems refrigeration and steam systems conveying systems and buildings The authors discuss the subject in an ordered format that gives you the tools to produce food products with minimum cost Including modeling procedures for food processing systems and auxiliary systems they elucidate synthesis techniques and procedures Using a clear structure for different levels of information and data on different food processing alternatives the book outlines solutions to plant design problems in the context of overall optimization of an agro industrial system and corresponding food chain It provides the work procedures and techniques for solving the design problems of a food processing plant and in making a defined food product **Food Production**

**Management** ,1995 **Fishing Gazette** ,1983 **Frozen Food Technology** C.P. Mallett,1993 This book on frozen food as its title suggests is written for the food technologist and food scientist in the frozen food industry which includes both food and equipment manufacturers The information will also be useful for other disciplines within the food industry as a whole and for students of food technology The book the aim of which is to provide an up to date review of the technology of the frozen food industry has been divided into two parts dealing with generic industry issues and specific product areas respectively The first section opens with a chapter on the physics and chemistry of freezing including a review of glassy states The practical realisation of freezing is covered in the next chapter which also covers frozen distribution and storage Chapter 3 deals with packaging and packaging machinery a sector where there has recently of product safety is been considerable technological progress The key area discussed in detail in chapter 4 and includes microbiology and hygienic factory design as well as consumer reheating particularly microwave reheating Health and dietary considerations have become much more important to consumers and chapter 5 reviews the current nutritional status of frozen foods and their role in a modern diet The driving force for scientific and technological change in frozen foods is the massive market for its products and the consequent competitive pressures and the first part of the book concludes with a chapter on development of new frozen products and how to apply the technical knowledge both generic and product specific to innovate in a consumer driven market **Process**
