Database Of Dreams The Lost Quest To Catalog Humanity:

Database of Dreams Rebecca Maura Lemov, 2015-01-01 Just a few years before the dawn of the digital age Harvard psychologist Bert Kaplan set out to build the largest database of sociological information ever assembled It was the mid 1950s and social scientists were entranced by the human insights promised by Rorschach tests and other innovative scientific protocols Kaplan along with anthropologist A I Hallowell and a team of researchers sought out a varied range of non European subjects among remote and largely non literate peoples around the globe Recording their dreams stories and innermost thoughts in a vast database Kaplan envisioned future researchers accessing the data through the cutting edge Readex machine Almost immediately however technological developments and the obsolescence of the theoretical framework rendered the project irrelevant and eventually it was forgotten In a scrupulously researched and captivating new book Rebecca Lemov recounts the story of Kaplan s quest and brings to light an informative and disturbing chapter in the prehistory of Big Data Dust jacket

The Scientific Method Henry M. Cowles, 2020-04-14 The surprising history of the scientific method from an evolutionary account of thinking to a simple set of steps and the rise of psychology in the nineteenth century The idea of a single scientific method shared across specialties and teachable to ten year olds is just over a hundred years old For centuries prior science had meant a kind of knowledge made from facts gathered through direct observation or deduced from first principles But during the nineteenth century science came to mean something else a way of thinking The Scientific Method tells the story of how this approach took hold in laboratories the field and eventually classrooms where science was once taught as a natural process Henry M Cowles reveals the intertwined histories of evolution and experiment from Charles Darwin s theory of natural selection to John Dewey s vision for science education Darwin portrayed nature as akin to a man of science experimenting through evolution while his followers turned his theory onto the mind itself Psychologists reimagined the scientific method as a problem solving adaptation a basic feature of cognition that had helped humans prosper This was how Dewey and other educators taught science at the turn of the twentieth century but their organic account was not to last Soon the scientific method was reimagined as a means of controlling nature not a product of it By shedding its roots in evolutionary theory the scientific method came to seem far less natural but far more powerful This book reveals the origin of a fundamental modern concept Once seen as a natural adaptation the method soon became a symbol of science s power over nature a power that until recently has rarely been called into question

Common Phantoms Alicia Puglionesi, 2020-08-25 S ances clairvoyance and telepathy captivated public imagination in the United States from the 1850s well into the twentieth century Though skeptics dismissed these experiences as delusions a new kind of investigator emerged to seek the science behind such phenomena With new technologies like the telegraph collapsing the boundaries of time and space an explanation seemed within reach As Americans took up psychical experiments in their homes the boundaries of the mind began to waver Common Phantoms

brings these experiments back to life while modeling a new approach to the history of psychology and the mind sciences Drawing on previously untapped archives of participant reported data Alicia Puglionesi recounts how an eclectic group of investigators tried to capture the most elusive dimensions of human consciousness A vast though flawed experiment in democratic science psychical research gave participants valuable tools with which to study their experiences on their own terms Academic psychology would ultimately disown this effort as both a scientific failure and a remnant of magical thinking but its challenge to the limits of science the mind and the soul still reverberates today Technologies of Speculation Sun-ha Hong,2020-07-28 An inquiry into what we can know in an age of surveillance and algorithms Knitting together contemporary technologies of datafication to reveal a broader underlying shift in what counts as knowledge Technologies of Speculation reframes today s major moral and political controversies around algorithms and artificial intelligence How many times we toss and turn in our sleep our voluminous social media activity and location data our average resting heart rate and body temperature new technologies of state and self surveillance promise to re enlighten the black boxes of our bodies and minds But Sun ha Hong suggests that the burden to know and to digest this information at alarming rates is stripping away the liberal subject that knows for themselves and risks undermining the pursuit of a rational public What we choose to track and what kind of data is extracted from us shapes a society in which my own experience and sensation is increasingly overruled by data driven systems From the rapidly growing Quantified Self community to large scale dragnet data collection in the name of counter terrorism and drone warfare Hong argues that data s promise of objective truth results in new cultures of speculation In his analysis of the Snowden affair Hong demonstrates an entirely new way of thinking through what we could know and the political and philosophical stakes of the belief that data equates to knowledge When we simply cannot process all the data at our fingertips he argues we look past the inconvenient and the complicated to favor the comprehensible In the process racial stereotypes and other longstanding prejudices re enter our newest technologies by the back door Hong reveals the moral and philosophical equations embedded into the algorithmic eye that now follows us all

Journalists and Knowledge Practices Hansjakob Ziemer,2022-11-11 This multi disciplinary anthology provides new perspectives on the journalist s role in knowledge generation in the newspaper age covering diverse topics from fake news to new technologies Fake news journalistic authority and the introduction of cutting edge technologies are often viewed as new topics in journalism However these issues were prevalent long before the twenty first century Connecting for the first time two burgeoning strands of research a newly perceived history of knowledge and the study of journalism Journalists and Knowledge Practices provides insights into the journalist s role in the world of knowledge in the newspaper age ca 1860s to 1970s This multi disciplinary anthology asks how journalists conducted their work and reconstructs histories of journalistic practices in specific regional constellations in Europe and North America From fake news writing to inventing psychological concepts integrating electric telegrams to fabricating photographs explaining pandemics to creating communities these case

studies written by distinguished scholars from various disciplines in the humanities show how notions of fact and truth were shaped new technologies integrated and knowledge transfers arranged This book is crucial reading for scholars and students interested in the historically changing relationships between journalistic practices and the generation and dissemination of knowledge This volume is crucial reading for scholars and students interested in the history of journalistic practice *The New Politics of Numbers* Andrea Mennicken, Robert Salais, 2021-10-11 This open access book offers unique insight into how and where ideas and instruments of quantification have been adopted and how they have come to matter Rather than asking what quantification is *New Politics of Numbers* explores what quantification does its manifold consequences in multiple domains It scrutinizes the power of numbers in terms of the changing relations between numbers and democracy the politics of evidence and dreams and schemes of bettering society The book engages Foucault inspired studies of quantification and the economics of convention in a critical dialogue In so doing it provides a rich account of the plurality of possible ways in which numbers have come to govern highlighting not only their disciplinary effects but also the collective mobilization capacities quantification can offer This book will be invaluable reading for academics and graduate students in a wide variety of disciplines as well as policymakers interested in the opportunities and pitfalls of governance by numbers *The Routledge Handbook of Religion and Secrecy* Hugh B. Urban, Paul Christopher Johnson, 2022-03-29 Secrecy is a central and integral component of all religious traditions Not limited simply to religious groups that engage in clandestine activities such as hidden rites of initiation or terrorism secrecy is inherent in the very fabric of religion itself Its importance has perhaps never been more acutely relevant than in our own historical moment In the wake of 9 11 and other acts of religious violence we see the rise of invasive national security states that target religious minorities and pose profound challenges to the ideals of privacy and religious freedom accompanied by the resistance by many communities to such efforts As such questions of secrecy privacy surveillance and security are among the most central and contested issues of twenty first century religious life *The Routledge Handbook of Religion and Secrecy* is the definitive reference source for the key topics problems and debates in this crucial field and is the first collection of its kind Comprising twenty nine chapters by a team of international contributors the Handbook is divided into five parts Configurations of Religious Secrecy Conceptual and Comparative Frameworks Secrecy as Religious Practice Secrecy and the Politics of the Present Secrecy and Social Resistance Secrecy Terrorism and Surveillance This cutting edge volume discusses secrecy in relation to major categories of religious experience and individual religious practices while also examining the transformations of secrecy in the modern period including the rise of fraternal orders the ongoing wars on terror the rise of far right white supremacist groups increasing concerns over religious freedom and privacy the role of the internet in the spread and surveillance of such groups and the resistance to surveillance by many indigenous and diasporic communities *The Routledge Handbook of Religion and Secrecy* is essential reading for students and researchers in religious studies comparative religion new religious movements and religion and

A Feast of Flowers Christopher Krupa, 2022-04-05 When Ecuador's cut flower industry took off in the mid 1980s it rode a wave of international credit peddling and currency speculation that would lead countries of the Global South into successive debt crises and northern financial firms to fortune and dominion By the start of the twenty first century as the Ecuadorian economy collapsed and its ties with international finance became strained flower exporters rebuilt their businesses around the profitability of their indigenous labor force drawing local communities deeply into new plantation systems taking over the highlands In *A Feast of Flowers* Christopher Krupa goes inside Ecuador's booming cut flower industry to chronicle the ways its capitalist pioneers built a booming export industry around a racial ideology turning indigenous people's purported differences into resources for industrial expansion At the core of this racial system is a belief central to postcolonial science and politics in Ecuador in capitalism's unique capacity to change people's racial identity and to liberate oppressed populations from racial subordination Krupa shows how such views not only guide how indigenous people are today incorporated into demanding labor systems in Ecuador's new export plantations but also how indigenous minds and bodies became sites of study and intervention by scientists politicians and economic planners throughout the last century all looking to change indigenous people in some way Combining nearly two decades of ethnographic and historical research *A Feast of Flowers* shows how aggressive capitalist expansion in postcolonial contexts may revive longstanding intersections between race and economy to facilitate new modes of dispossession under the guise of humanitarian intervention
