Spatz, 2012-12-06      **Developmental Aspects of Oral Biology** Harold C. Slavkin, Lucien A. Bavetta, 2013-10-22 Developmental Aspects of Oral Biology assembles within one volume selected contributions from highly competent investigators currently engaged in research on developmental problems in oral tissues The primary objective of this book is to facilitate rapid and lucid communication among researcher teacher student and the practitioner interested in oral tissues and oral diseases This is best accomplished by providing critical surveys of discussions of the state of knowledge or concepts in relevant areas of biology that relate to development development in terms of embryogenesis prenatal growth and development maturation senescence and developmental aberrations which manifest themselves as oral pathology The book begins with a study on the nutritional aspects of embryogenesis Separate chapters then cover the molecular biology of developing systems immunological determinants in development and the migration interaction and early differentiation of orofacial tissues Subsequent chapters deal with topics such as the development of the primary and secondary palate and the taste buds tissue interaction during in vitro odontogenesis matrix development in mineralizing tissues and macromolecular interactions in the connective tissues of the periodontium      Biomedical Index to PHS-supported Research ,1987      **Model Systems of Development and Aging of the Nervous System** Antonia Vernadakis, Alain M. Privat, Jean M. Lauder, Paola S. Timiras, 2012-12-06 The last decade has generated a multitude of studies using in vitro model systems to explore growth and differentiation of the nervous system Although the findings have been exciting and have revealed unique properties of neural cells considerable concern continues to be expressed regarding the significance of in vitro findings in terms of their applicability to in vivo biological events To examine this issue further a group of scientists presented and discussed their findings at a conference sponsored by the Institute of Developmental Neuroscience and Aging held in Crete Greece 26 29 May 1985 The conference was cosponsored by the University of Crete and was generously supported by the Ministry of Research and Technology of Greece Tourism Organization of Greece and also Sandoz and FIDIA The Directors of the Institute of Developmental Neuroscience and Aging are indebted to these Institutions for their support For the success of this conference the Directors owe much to Drs Eleni Fleischer Lambropoulos and Yiannis Tsouderos who spent countless hours in making arrangements so that the participants would have not only a scientific but also a unique cultural experience Several chapters of this book focus on the complex phenomena of neurogenesis and gliogenesis and the modulation of neuronal differentiation The concept that neuronal differentiation has both genetic and epigenetic components is documented by elegant studies using both in vitro cultured cells and neurons transplanted in vivo      Indexes to the Epilepsy Accessions of the Epilepsy Information System J.
