

Neufert

Architects' Data

Fourth Edition

Neufert's Architects' Data is an essential reference for the initial design and planning of a building project. It provides, in one concise volume, the core information needed to form the framework for the more detailed design and planning of any building project. Organized largely by building type, it covers the full range of preliminary considerations, and with over 4200 diagrams it provides a mass of data on spatial requirements.

Most illustrations are dimensioned and each building type includes plans, sections, site layouts and design details. An extensive bibliography and a detailed set of metric/imperial conversion tables are included. Since it was first published in Germany in 1936, Ernst Neufert's handbook has been progressively revised and updated through 38 editions and many translations. This fourth English language edition is translated from the 38th German edition, and represents a major new edition for an international, English-speaking readership.

Reviews of the Previous Edition:

"Neufert's Architects' Data was the first book I bought when I started my studies in architecture. It was invaluable for me then and it is still a useful aid in my designs."

Cesar Pelli

"With this thorough revision Neufert has produced yet again an invaluable reference book."
