

The background of the entire image is a landscape painting. It depicts a wide river flowing through a valley. In the foreground, there are rolling hills with green grass and several large, dark green trees. The middle ground shows the river winding through the valley, with some small islands or peninsulas. In the background, there are more hills and mountains under a hazy, light-colored sky. A white rectangular box with a thin black border is centered in the upper half of the image, containing the title and subtitle.

Europe's Steppe Frontier

1500–1800

William McNeill

By William H McNeill Europe's Steppe Frontier 1500-1800 Paperback:

Europe's Steppe Frontier, 1500-1800 William H. McNeill, 2024-05-31 In *Europe's Steppe Frontier* acclaimed historian William H McNeill analyzes the process whereby the thinly occupied grasslands of southeastern Europe were incorporated into the bodies social of three great empires the Ottoman the Austrian and the Russian McNeill benefits from a New World detachment from the bitter nationality quarrels of the late nineteenth and early twentieth century which inspired but also blinded most of the historians of the region Moreover the unique institutional adjustments southeastern Europeans made to the frontier challenge cast indirect light upon the peculiarities of the North American frontier experience **Europe's Steppe Frontier, 1500-1800** William Hardy McNeill, 1964 *Southeast European Studies in a Globalizing World* Christian Promitzer, Siegfried Gruber, Harald Heppner, 2014 Since the early 1990s Southeast European studies have undergone profound changes being shaped by the wars of Yugoslav succession and the ramifications of post socialism coupled with democratic deficiencies which characterize most of Southeast Europe The countries which it encompasses rest uneasily on the periphery of the developed variant of Western capitalism but they have nonetheless to contend with the challenges of adjusting to a market economy The imprint of these contexts on academic research has led to a discussion of the role of Southeast European studies It is the task of this volume to summarize and raise awareness of this discussion Series Studies on South East Europe Vol 16 Subject European Studies Sociology Politics **Specialist Markets in the Early Modern Book World** , 2015-05-19 *Specialist Markets in the Early Modern Book World* edited by Richard Kirwan and Sophie Mullins investigates an underexplored yet important facet of early modern book production Bringing together 19 detailed case studies this volume considers and reconstructs the characteristics of specialist book production in the early modern period In particular it explores the motives that led to specialisation ranging from the desire for profit on the part of risk taking entrepreneurial individuals or family firms to the more propagandist or missionising aims of corporate groups who subsidised production often without regard for profit The book also explores the economic and personal pressures and perils that accompanied specialist production which was often a risk laden enterprise that could end in financial and social ruin

Civilisations, Civilising Processes and Modernity - A Debate Artur Bogner, Stephen Mennell, 2022-02-28 In 1984 the celebrated sociologist and historian Norbert Elias convened a major conference on Civilisations and civilising processes at the Centre for Interdisciplinary Research University of Bielefeld Participants included the most distinguished and influential scholars in historical sociology and world history This book will make available for the first time in one place the papers presented by the speakers and even more interestingly the transcripts of discussions at the symposium This conference brought together eminent and internationally reputed scholars of macro history and historical sociology including Johann P Arnason Elias Hans Dieter Evers Johan Goudsblom Keith Hopkins William H McNeill and Immanuel Wallerstein This highly informative encounter between various leading scholars of humanity's global social history has never before been published

although it was completely recorded on paper and in tape recordings Its publication in one volume should be an important event for all students of the long term structural transformations of humanity *Ottoman Wars, 1700-1870* Virginia Aksan, 2014-01-14 The Ottoman Empire had reached the peak of its power presenting a very real threat to Western Christendom when in 1683 it suffered its first major defeat at the Siege of Vienna Tracing the empire's conflicts of the next two centuries *The Ottoman Wars An Empire Besieged* examines the social transformation of the Ottoman military system in an era of global imperialism Spanning more than a century of conflict the book considers challenges the Ottoman government faced from both neighbouring Catholic Habsburg Austria and Orthodox Romanov Russia as well as arguably more importantly from military intellectual and religious groups within the empire Using close analysis of select campaigns Virginia Aksan first discusses the Ottoman Empire's changing internal military context before addressing the modernized regimental organisation under Sultan Mahmud II after 1826 Featuring illustrations and maps many of which have never been published before *The Ottoman Wars* draws on previously untapped source material to provide an original and compelling account of an empire near financial and societal collapse and the successes and failures of a military system under siege The book is a fascinating study of the decline of an international power raising questions about the influence of culture on warfare **The Making of Modern Europe, 1648-1780** Geoffrey Treasure, 2003-12-16 This reissue of a classic textbook has been revised and updated with a new introduction by the author Geoffrey Treasure provides a thoroughly comprehensive account of the European experience at a time when so much of what is today identified as modern began to take shape Discussing key issues of the period *The Making of Modern Europe 1647 1980* examines the evolution of the developing society detailed studies of the people their environment attitudes and beliefs economic aspects the growth of the states politics war and diplomacy religion intellectualism and science This work provides an excellent grounding for the study of seventeenth and eighteenth century European history **Ukraine, the Middle East, and the West** Thomas M. Prymak, 2021-05-15 For decades Ukrainian contacts with the outside world were minimal impeded by politics ideology and geography But prior to the Soviet period the country enjoyed diverse exchanges with on the one hand its Islamic neighbours the Crimean Khanate and the Ottoman Empire and on the other its central and western European neighbours especially Poland and France Thomas Prymak addresses geographical knowledge international travel political conflicts historical relations with religiously diverse neighbours artistic developments and literary and language contacts to smash old stereotypes about Ukrainian isolation and tell a vivid and original story The book treats a wide range of subjects including Ukrainian travellers in the Middle East from pilgrims to the Holy Land to political exiles in Turkey and Iran Tatar slave raiding in Ukraine the poetry of Taras Shevchenko and the Russian war against Imam Shamil in the High Caucasus Ukrainian themes and the French writers Honoré de Balzac and Prosper Mérimée Rembrandt's mysterious painting today titled *The Polish Rider* and Ilya Repin's legendary painting of the Zaporozhian Cossacks writing their satirical letter mocking the

Turkish sultan Drawing together political and cultural history languages and etymology and folklore and art history Ukraine the Middle East and the West is an original interdisciplinary study that reintroduces Ukraine's long overlooked connections beyond Eastern Europe

The Great Frontier William Hardy McNeill, 2019-02-19 A leading American historian examines the character of the frontiers of European expansion throughout the modern age questioning a notion of frontier freedom popular since Turner William McNeill argues that social hierarchy characterized the frontier more often than pioneer equality As Europeans traveled to various lands bringing new diseases to vulnerable natives formerly isolated populations died in great numbers creating an open frontier where labor was scarce European efforts to develop frontier areas involved either a radical leveling of the hierarchies common in Europe itself or alternatively their sharp reinforcement by resort to slavery serfdom peonage and indentured labor Juxtaposing national and transnational experiences and illuminating the complex interchange of peoples and illnesses in the modern era Professor McNeill brings the history of the United States into perspective as an example of a process that encircled the globe His book clarifies both the experience of the global frontier and the processes that now mark the end of hundreds of years of expansion of the European center William H McNeill is Robert A Millikan Distinguished Service Professor of History at the University of Chicago His numerous books include *The Rise of the West* Chicago *Plagues and Peoples* Doubleday and *The Human Condition* Princeton Originally published in 1983 The Princeton Legacy Library uses the latest print on demand technology to again make available previously out of print books from the distinguished backlist of Princeton University Press These editions preserve the original texts of these important books while presenting them in durable paperback and hardcover editions The goal of the Princeton Legacy Library is to vastly increase access to the rich scholarly heritage found in the thousands of books published by Princeton University Press since its founding in 1905

Plagues and Peoples William McNeill, 1977-10-11 The history of disease is the history of humankind an interpretation of the world as seen through the extraordinary impact political demographic ecological and psychological of disease on cultures A book of the first importance a truly revolutionary work The New Yorker From the conquest of Mexico by smallpox as much as by the Spanish to the bubonic plague in China to the typhoid epidemic in Europe *Plagues and Peoples* is a brilliantly conceptualized and challenging achievement Kirkus Reviews Upon its original publication *Plagues and Peoples* was an immediate critical and popular success offering a radically new interpretation of world history With the identification of AIDS in the early 1980s another chapter was added to this chronicle of events which William McNeill explores in his introduction to this edition Thought provoking well researched and compulsively readable *Plagues and Peoples* is essential reading that rare book that is as fascinating as it is scholarly as intriguing as it is enlightening
