The Archaeology of Anatolia, Volume IV Sharon R. Steadman, Gregory McMahon, 2021-12-13 This fourth volume in the Archaeology of Anatolia series offers reports on the most recent discoveries from across the Anatolian peninsula. Periods covered span the Epipalaeolithic to the Medieval Age and sites and regions range from the western Anatolian coast to Van and on to the southeast. The breadth and depth of work reported within these pages testifies to the contributors' dedication and love of their work even during a global pandemic period. The volume includes reviews of recent work at on going excavations and data retrieved from the last several years of survey projects. In addition a State of the Field section offers up to the moment data on specialized fields in Anatolian archaeology.

The Routledge Handbook of the Byzantine City Nikolas Bakirtzis, Luca Zavagno, 2024-01-31 The Byzantine world contained many important cities throughout its empire. Although it was not urban in the sense of the word today its cities played a far more fundamental role than those of its European neighbors. This book through a collection of twenty four chapters discusses aspects of and different approaches to Byzantine urbanism from the early to late Byzantine periods. It provides both a chronological and thematic perspective to the study of Byzantine cities bringing together literary documentary and archival sources with archaeological results material culture art and architecture resulting in a rich synthesis of the variety of regional and sub regional transformations of Byzantine urban landscapes. Organized into four sections this book covers Theory and Historiography Geography and Economy Architecture and the Built Environment and Daily Life and Material Culture. It includes more specialized accounts that address the centripetal role of Constantinople and its broader influence across the empire. Such new perspectives help to challenge the historiographical balance between margins and metropolis and also to include geographical areas often regarded as peripheral like the coastal urban centers of the Byzantine Mediterranean as well as cities on islands such as Crete Cyprus and Sicily which have more recently yielded well excavated and stratigraphically sound urban sites. The Routledge Handbook of the Byzantine City provides both an overview and detailed study of the Byzantine city to specialist scholars students and enthusiasts alike and therefore will appeal to all those interested in Byzantine urbanism and society as well as those studying medieval society in general.

The Holy Portolano / Le Portulan sacré Michele Bacci, Martin Rohde, 2014-12-11 Trotz der zahlreichen Publikationen die in den letzten Jahren der Erforschung der mittelalterlichen Seewege im Mittelmeer des konomischen und kulturellen Austausches und des Ph nomen der Pilgerfahrt gewidmet waren bleibt das Thema der spezifischen Andachtsformen die mit der Seefahrt verbunden waren und zur Herstellung von privilegierten Heiligt mern f r die Seefahrer f hrten noch ein Desideratum. Wie viele bis jetzt zu wenig beachtete Urkunden best tigen bildete sich im Sp tmittelalter ein transmediterranes Netzwerk von Heiligen Orten die insbesondere von Seefahrern besucht wurden und deren Verehrungsw rdigkeit mit ihrer Lage am symbolischen Treffpunkt zwischen den Dimensionen Wasser Erde und Himmel direkt zusammenhing. Die in diesem Band versammelten und von Spezialisten

Eugene Kleinbauer, 1992 *“Buyurdum ki...” - The Whole World of Ottomanica and Beyond*, 2023-09-04 This book is dedicated to Claudia R mer and brings together 33 contributions spanning a period from the 15th to the 20th century and covering the wide range of topics with which the honouree is engaged The volume is divided into six parts that present current research on language literature and style as well as newer approaches and perspectives in dealing with sources and terminologies Aspects such as conquest administration and financing of provinces are found as well as problems of endowments and the circulation of goods in the Arab provinces of the Ottoman Empire Another main topic is dedicated to minorities and their role and situation in various provinces and cities of the Ottoman Empire as represented by various sources But also topics like conversion morality and control are illuminated Finally the volume provides an insight into the late Ottoman and early republican period in which some previously

Identities and Allegiances in the Eastern Mediterranean after 1204 Guillaume Saint-Guillain, 2016-09-17 This volume of studies explores a particularly complex period in Byzantine history the thirteenth century from the Fourth Crusade to the recapture of Constantinople by exiled leaders from Nicaea During this time there was no Greek state based on Constantinople and so no Byzantine Empire by traditional definition Instead a Venetian Frankish alliance ruled from the capital while many smaller states also claimed the mantle of Byzantium Even after 1261 when the Latin Empire of Constantinople was replaced by a restored Greek state political fragmentation persisted This fragmentation makes the study of individuals more difficult but also more valuable than ever before and this volume demonstrates the very considerable advances in historical understanding that may be gained from prosopographical approaches Specialist historians of the Byzantine successor states of the period and of their most important neighbours here examine the self projection and interactions of these states combining military history and diplomacy commercial and theological contacts and the experiences and self description of individuals This wide ranging series of articles uses a great diversity of sources Arabic Armenian Bulgarian Greek Latin Persian and Serbian to exploit the potential of the novel methodology employed and of prosopography as an additional historical tool of analysis

Beyond Icons William R. Caraher, Kostis Kourelis, Darlene L. Brooks Hedstrom, 2024-09-19 This book is a collective reflection on the relationship between theory and methods as practiced by American archaeologists of the Byzantine period in Greece Turkey Ukraine and Egypt between the 1990s and 2020s The eleven authors represent a generational voice that employed theory to redirect the established narratives of the golden age of Byzantine archaeology 1960s 1980s that privileged art and religion Beyond Icons Theories and Methods in Byzantine Archaeology in North America originated in three conferences 2010 2012 and 2013 organized by the Program of Byzantine Studies at Dumbarton Oaks in Washington D C Acknowledging the role that Dumbarton Oaks played in the golden age of Byzantine archaeology Program Director Margaret Mullett designed these conferences as exercises in conceptualizing the field's future The chapters consider theories of fragments methodologies in regional surface survey stratigraphy habitus phenomenology gender theory craft dreams and sound In doing so they capture a moment in the study of Byzantine archaeology and material culture and chart out future directions for the field This book will appeal to scholars and students alike as well as all those interested in Byzantine Studies medieval archaeology particularly of the eastern Mediterranean and Byzantine material culture It will also be of interest to anyone seeking to understand the emerging narrative of a global Middle Ages The chapters reflect the ways in which the study of Byzantine archaeology was shaped by the scholarship of those working in the United States and Canada

Art and Identity in Thirteenth-Century Byzantium Antony Eastmond, 2017-03-02 The church of Hagia Sophia in Trebizond built by the emperor Manuel I Grand Komnenos 1238 63 in

the aftermath of the fall of Constantinople to the Fourth Crusade is the finest surviving Byzantine imperial monument of its period Art and Identity in Thirteenth Century Byzantium is the first investigation of the church in more than thirty years and is extensively illustrated in colour and black and white with many images that have never previously been published Antony Eastmond examines the architectural sculptural and painted decorations of the church placing them in the context of contemporary developments elsewhere in the Byzantine world in Seljuq Anatolia and among the Caucasian neighbours of Trebizond Knowledge of this area has been transformed in the last twenty years following the collapse of the Soviet Union The new evidence that has emerged enables a radically different interpretation of the church to be reached and raises questions of cultural interchange on the borders of the Christian and Muslim worlds of eastern Anatolia the Caucasus and Persia This study uses the church and its decoration to examine questions of Byzantine identity and imperial ideology in the thirteenth century This is central to any understanding of the period as the fall of Constantinople in 1204 divided the Byzantine empire and forced the successor states in Nicaea Epiros and Trebizond to redefine their concepts of empire in exile Art is here exploited as significant historical evidence for the nature of imperial power in a contested empire It is suggested that imperial identity was determined as much by craftsmen and expectations of imperial power as by the emperor's decree and that this was a credible alternative Byzantine identity to that developed in the empire of Nicaea
