Stopwatches

Your watch has two stopwatch modes: a Single Stopwatch Mode and a Dual Stopwatch Mode. Both stopwatch modes measure times in 1/100-second units for the first hour, and in 1-second units after that. In both stopwatch modes, timing is possible up to 99 hours, 59 minutes, 59.99 seconds.

The Single Stopwatch Mode (ST1) displays the total elapsed time and is best for a single vehicle or runner. The Dual Stopwatch Mode (ST2) can be used to measure elapsed time for two vehicles or runners at the same time, including separate lap times and the time differential between vehicles or runners.

The data produced by either stopwatch mode is stored automatically in watch memory for later recall when you need it.

- When the elapsed time being kept by either of the stopwatches exceeds 99 hours, 59 minutes, 59.99 seconds, the displayed time returns to all zeros and time measurement continues from there. Elapsed time measurement continues until you press **(C)** to all zeros.
- All of the operations in this section are performed in the stopwatch modes, which you enter by pressing **(C)**.
