issues that matter *Teaching Primary Years* Katherine Main, 2020-07-16 The primary years are recognised as a distinct period in a child's development with significant consequences for ongoing educational success. During this critical time formal schooling and the associated activities introduce children to new and extended social roles where they learn to cooperate and collaborate with their peers and adults. Children also begin to develop a sense of themselves and their competence in a range of domains including social, academic, sport and music. This edited collection provides specialist guidance in developing curriculum, pedagogy and assessment to meet the needs of primary years children. The text begins by exploring the unique characteristics of this age group including cognitive, social, emotional and physical development. It considers the expectations of teachers including ethical and legal issues and guidance on how to develop positive learning spaces and collaborative approaches. There is an exploration of the needs of the child including facilitating transition from the early years and into secondary school. The text then considers the curriculum in depth including language and literacy, mathematics and numeracy, science and technology, health and physical education and the humanities. A focus on some of the key challenges in primary education brings the book to its conclusion including effectively harnessing digital technology, developing age appropriate pedagogies, practising differentiated learning and effective assessment. Rich with insights from experts in the field and featuring case studies and practical examples throughout, this is a key resource for both pre-service and in-service primary teachers. Other professionals working with primary years students and parents will also benefit from engaging with this book.

Social Interaction and Teacher Cognition Li Li, 2017-02-06 Investigates language teachers' thoughts, beliefs and knowledge through the lens of social interaction. In the past decade there has been a surge of interest in the study of language teacher cognition: what language teachers know, think and believe and of its relationship to teachers' classroom practices. *Social Interaction and Teacher Cognition* is the first book to use a discursive psychological perspective to examine teacher cognitions. Informed by conversation analysis (CA), the book offers a close examination of cognition in interaction in three distinctive aspects: learning to teach, novice and expert teachers' cognition and interactive decision making. The book views cognition as a socially constructed and contextual process and treats interaction as a framework that deals with psychological matters in a public and visible way. It will be of particular relevance to those researching teacher cognition in EFL contexts and will appeal to anyone interested in the study of classroom interaction. Features a three-part structure of survey, analysis and application. Takes a discursive psychological approach to teacher cognitions. Uses conversation analysis to examine cognition in interaction. Provides detailed examples of language in interaction in EFL contexts.
