

The book cover features a stylized illustration of three buildings made of green ivy, set against a light blue sky. The buildings are positioned on a green lawn, which sits atop a thick layer of dark brown soil. The title 'Understanding Climate Change' is written in a large, serif font, with 'Understanding' in black and 'Climate Change' in green. To the right of the title, the subtitle 'SCIENCE, POLICY, AND PRACTICE' is written in a smaller, black, sans-serif font. At the bottom, the authors' names 'Sarah L. Burch and Sara E. Harris' are displayed in white text on a dark brown rectangular background. Below this, the words 'SECOND EDITION' are written in white, all-caps, sans-serif font on a light blue rectangular background.

Climate Change Science And Policy:

Climate Change Science and Policy Stephen H. Schneider, 2009-12-14 This is the most comprehensive and current reference resource on climate change available today. It features forty-nine individual chapters by some of the world's leading climate scientists. Its five sections address climate change in five dimensions: ecological impacts, policy analysis, international considerations, United States considerations, and mitigation options to reduce carbon emissions. In many ways, this volume supersedes the Fourth Assessment Report of the Intergovernmental Panel on Climate Change (IPCC). Many important developments too recently to be treated in the 2007 IPCC documents are covered here. Overall, *Climate Change Science and Policy* paints a darker picture of the effects of climate change than do the IPCC reports. It reveals that climate change has progressed faster than the IPCC reports anticipated and that the outlook for the future is bleaker than the IPCC reported.

Understanding Climate Change Sarah Burch, Sara E. Harris, 2021-02-28 The second edition of *Understanding Climate Change* provides readers with a concise, accessible, and holistic picture of the climate change problem, including both the scientific and human dimensions.

Understanding Climate Change Sarah L. Burch, Sara E. Harris, 2021-06-04 The second edition of *Understanding Climate Change* provides readers with a concise, accessible, and holistic picture of the climate change problem, including both the scientific and human dimensions.

Climate Change Eileen Claussen, Vicki Arroyo, Cochran, Debra P. Davis, 2001-01-01 It is the greatest environmental challenge of the 21st Century. But what do we truly know about global climate change? And what can we do about it? Most of the world's top scientists agree that emissions of carbon dioxide and other greenhouse gases from human activities such as industrial processes, fossil fuel combustion, and land use changes are causing the earth to get warmer. Impacts of this warming may include damage to our coastal areas, accelerated rates of species loss, altered agricultural patterns, and increased incidences of infectious diseases. The effects of climate change and efforts to mitigate climate change could also have substantial economic ramifications. The book presents the latest research and analysis from prominent scientists, economists, academics, and policy makers, including Tom Wigley and Joel Smith, who along with other authors of the Science and Impacts chapter, explain the basic science of climate change, the growing evidence that human activities are changing our climate, and the impacts of these changes. Eileen Claussen, John Gummer, Henry Lee, and other authors of the Global Strategies chapter, describe what nations are or are not doing to address climate change and the state of international climate talks. Robert Stavins, John Weyant, Ev Ehrlich, and other economists explain why economic analyses of climate policy are conducted, why the projected costs of addressing climate change vary so widely among economic models, and how changes driven by today's economy can influence climate policy. Gov. Jean Shaheen and other authors of the Innovative Solutions chapter, describe what state and local governments in the United States and multinational companies are doing to monitor and curb greenhouse gas emissions. and Forest Reinhardt, who offers business leaders advice on steering their companies on a path that is healthy for business as
