Climbing The Himalayas Of School Leadership The Socialization Of Early Career Administrators:

Climbing the Himalayas of School Leadership Carol A. Mullen, 2004-05-03 Here Carol Mullen uncovers vital information about the needs of the nation's schools that can be reflected in program content and policy reform. She contends that in today's education climate there exists an urgent call for university faculty to take responsibility for reforming university preparation programs. Otherwise the least effective of these programs could be eliminated as has already occurred in North Carolina. This book should help principal preparation programs that are behind the times to move forward. Such programs can thus be expected to be aligned not only with the expectations of universities, policymaking bodies and the public but also with school districts and practicing school leaders. *The Handbook of Leadership and Professional Learning Communities*

C. Mullen, 2009-10-13 Contributors offer ideas, applications and resources for helping leaders and educators tackle the challenges of building successful professional learning communities. This wide-ranging text will prove indispensable for any democratically accountable leader committed to organizational change through communities of practice. **Curriculum**

Leadership Development Carol A. Mullen, 2012-11-12 Curriculum Leadership Development is an up-to-date, user-friendly textbook offering unique approaches to help readers understand the complexity of curriculum leadership. It is grounded in current and relevant theory, research, legislation and application in the closely related areas of curriculum leadership development and scholarship. The text solidifies the concepts of curriculum and leadership in experiential learning contexts and promotes democratic action and critical thinking. Author Carol A. Mullen uses a descriptive, qualitative approach that integrates case study, data analysis, personal reflection and lessons learned. Among the most important elements of the book are the inclusion of the voice and curricular experiences of the professional student who is a seasoned teacher or beginning administrator, detailed illustrations of practitioners' experiences as curriculum makers and action researchers, an articulation of the links among curriculum development, constructivist curricula and mentoring scaffolds, and practical exercises to accompany case studies. Graduate and advanced undergraduate students in education will find this textbook of value in their coursework as will curriculum professionals who teach practicing teachers. **Fire & Ice** Carol A. Mullen, 2005

Fire & Ice Carol A. Mullen, 2005 Fire & Ice presents the educational inquiry process to school practitioners and aspiring leaders. The context for this study is unusual because it addresses inquiry learning at both the master's and doctoral level and within group settings. The picture that emerges illustrates ways for mentors to engage graduate students in learning writing and research through collaborative structures with an emphasis on learning communities as the primary vehicle for growth and success. In the book, graduate students have served as research participants, focus group members and survey respondents in their dual role as peer mentor. Because graduate education is being challenged to meet the changing needs of the twenty-first century, the influence of the professions on academic degrees has meant that students must develop as scholar-practitioners instead of strictly intellectual academics. Metaphorically, the fire possibility, desire and content and ice restraint, structure and form of scholarly inquiry is

used as a literary device to capture what it might mean for students to perform inquiry *Mentorship Primer* Carol A. Mullen, 2005 Mullen University of South Florida frames the essential philosophical historical and epistemological foundations of mentoring and explores the potential value of mentor relationships in public school and college teaching programs
