This book provides a critical and innovative reassessment of contemporary debate on the human animal relationship Starting with a critique of the official philosophical narration of animal studies and then a reassessment of Descartes animal machine paradigm Simone Ghelli tracks down the conceptual coordinates of what he calls the paradigm of the suffering animal The suffering animal is a materialist thesis on the condition of the living which while contesting the metaphysical and anthropocentric structure of western axiology eventually redefines and re establishes ethics on the experience of suffering that is on the mutual compassion sentient beings feel before the unjust sight of their finitude The suffering animal paradigm shows how within our philosophical tradition the animal question has been always intertwined with the questions of atheism and of materialism The ultimate aim of this research is to define the ethical equilibrium between aspects of the living such as weakness and power joy and suffering life and death which our philosophical tradition largely tends to consider as mutually excluding To overcome such oppositions means avoiding opposing in our ethical and political discourse the defense of the vulnerability of the weak and the freedom of the powerful The Darwin Effect Jerry Bergman,2014-09-26
