Designer Evolution A Transhumanist Manifesto:

Designer Evolution Simon Young, 2009-09-25 Young presents a polemical espousal of transhumanist philosophy and a trenchant attack on its critics the Bio Luddites The author calls for a rejection of premodern superstition and postmodern nihilism in favor of a renewed belief in human progress through scientific rationality *Governance of Human Gene Editing and Transhumanism* Lillian Santos, 2025-01-09 Are there any commonalities between Transhumanism and the WHO framework for global governance of human genome editing If yes what are they and what are the implications for Bioethics To find possible common themes the author applied the reflective thematic analysis RTA method to a set of texts on Transhumanism and a set of texts on the global governance of human genome editing The selected transhumanist texts were the three documents Humanity the former World Transhumanist Association calls the original documents on Transhumanism The Transhumanist Declaration Transhumanist FAQ 3.0 The Transhumanist Manifesto v 4 The selected texts to represent the global governance of human genome editing were the three documents published by WHO on the topic in 2021 the only plan for the global governance of this biotechnology to date Human genome editing a framework for governance Human genome editing recommendations Human genome editing position paper As a result of the application of the RTA method to the selected texts the author presents and explains three common themes What does this mean for our society What are the implications of the current situation What are the tasks for Bioethics There are emerging questions on the human condition and new concerns to be addressed by Bioethics such as the do it yourself mentality The limitations of therapy vs enhancement ask for serious work on a better bioethical paradigm This book analyses the object intentions and circumstances of enhancement in general and recommends the principle of proportionality The author questions the predominant values and propose a refinement to some conceptions of autonomy protection and equality Finally this book offers key elements for the bioethical evaluation of each type of human genome editing Recognising the current situation and working on the identified tasks has become crucial for contemporary Bioethics Designer Evolution Simon Young, 2006 No Marketing Blurb **Governing the Future** Henning Glaser, Pindar Wong, 2025-02-28 We are living in times of deep and disruptive change Perhaps the most powerful vector of this change can be described by three related catchphrases digitalization artificial intelligence and dataism Drawing on considerable expertise from a wide range of scholars and practitioners this interdisciplinary collection addresses the challenges impacts opportunities and regulation of this civilizational transformation from a variety of angles including technology philosophy cultural studies international law sociology and economics This book will be of special interest to scholars students analysts policy planners and decision makers in think tanks international organizations and state agencies studying and dealing with the development and governance of disruptive technologies **Cyborg Selves** Jeanine Thweatt-Bates, 2016-05-13 What is the posthuman Is becoming posthuman inevitable something which will happen to us or something we will do to ourselves Why do some long

for it while others fearfully reject it These questions underscore the fact that the posthuman is a name for the unknown future and therefore not a single idea but a jumble of competing visions some of which may be exciting some of which may be frightening and which is which depends on who you are and what you desire to be This book aims to clarify current theological and philosophical dialogue on the posthuman by arguing that theologians must pay attention to which form of the posthuman they are engaging and to demonstrate that a posthuman theology is not only possible but desirable when the vision of the posthuman is one which coincides with a theological vision of the human

Transhumanism and Transcendence Ronald Cole-Turner, 2011-09-29 The timeless human desire to be more beautiful intelligent healthy athletic or young has given rise in our time to technologies of human enhancement Athletes use drugs to increase their strength or stamina cosmetic surgery is widely used to improve physical appearance millions of men take drugs like Viagra to enhance sexual performance And today researchers are exploring technologies such as cell regeneration and implantable devices that interact directly with the brain Some condemn these developments as a new kind of cheating not just in sports but in life itself promising rewards without effort and depriving us most of all of what it means to be authentic human beings Transhumanists on the other hand reject what they see as a rationalizing of human limits as if being human means being content forever with underachieving bodies and brains To be human they insist is to be restless with possibilities always eager to transcend biological limits As the debate grows in urgency how should theology respond Christian theologians recognize truth on both sides of the argument pointing out how the yearnings of the transhumanists if not their technological methods find deep affinities in Christian belief In this volume Ronald Cole Turner has joined seasoned scholars and younger emerging voices together to bring fresh insight into the technologies that are already reshaping the future of Christian life and hope

Religion and Transhumanism Calvin Mercer, Tracy J. Trothen, 2014-11-17 Should technology be used to improve human faculties such as cognition and longevity This thought provoking dialogue between transhumanism and religion examines enhancement technologies that could radically alter the human species Transhumanism or human enhancement is an intellectual and cultural movement that advocates the use of emerging technologies to change human traits Although they may sound like science fiction the possibilities suggested by transhumanism are very real and the questions they raise have no easy answers If these enhancements especially major ones like the indefinite extension of healthy human life become widely available they would arguably have a more radical impact on humankind than any other development in history This book comprises essays that explore transhumanism and the issues that surround it addressing numerous fascinating questions posed by scholars of religion from various traditions How will immortality or extreme longevity change our religious beliefs and practices How might pharmaceuticals enhance spiritual experiences Will post human technologies be available to all persons or will a superior post human race arise to dominate the human species The discussions are as intriguing as the future they suggest

Involuntary Death Timothy Leary, 2009-04-01 Death is increasingly on the agenda for baby boomers moving ever closer to it Timothy Leary brings some startlingly fresh ideas to this topic Fundamentally he claims we have been brainwashed by our institutions government organized religion the healthcare industry to accept death as an inevitable end Leary argues instead that death is misunderstood that we don't have to die and that there are commonsense alternatives His theory rests on the transhumanist approach that says human beings are evolving into spiritual machines beings that are part human and part machine and eventually will not die as the term is commonly understood Being fitted with machine parts like bionic knees is part of this process And as we evolve through the cybernetic age he says we will gain new wisdom that broadens our definition of personal immortality and gene pool survival the postbiologic option of the information species **Muslim and Supermuslim** Roy Jackson, 2020-02-05 This book looks to the rich and varied Islamic tradition for insights into what it means to be human and by implication what this can tell us about the future human The transhumanist movement in its more radical expression sees Homo sapiens as the cousin perhaps the poorer cousin of a new Humanity 2.0 Man is replaced by Superman The contribution that Islam can make to this movement concerns the central question of what this Superman or Supermuslim would actually entail To look at what Islam can contribute we need not restrict ourselves to the Qur'an and the legal tradition but also reach out to its philosophical and literary corpus Roy Jackson focuses on such contributions from Muslim philosophy science and literature to see how Islam can confront and respond to the challenges raised by the growing movement of transhumanism
