Pomar, 2012-05 For the past thirty five years Dr Barbara Pomar has guided her clients on journeys into their past lives *Confessions of a Regressionist* presents both her personal account of her work with clients working to reverse past decisions to change the present and future and the theories behind the practice For some the very existence of past lives let alone the ability to reconnect with them is a point of spirited debate Even so Dr Pomar has helped many to come to their own conclusions about the validity of this technique Now she guides readers on using her techniques to live more fully or mold their destinies She also discusses theories on why and how past life regression is possible If you've ever struggled with how the possibility of past life regression fits within your faith Dr Pomar offers advice on how to evaluate your conflict If you are a regressionist Dr Pomar's work can help you realize that by helping your client you also help past and future generations as well If you've ever considered meeting with a regressionist Dr Pomar explains how this sort of experience can help you live more fully in the present with joy confidence and prosperity by releasing or neutralizing memories of harmful events **System Design Modeling and Metamodeling** John P. van

Gigch,2013-06-29 This book is a venture in the worlds of modeling and of metamodeling At this point I will not reveal to readers what constitutes metamodeling Suffice it to say that the pitfalls and shortcomings of modeling can be cured only if we resort to a higher level of inquiry called metainquiry and metadesign We reach this level by the process of abstraction The book contains five chapters from my previous work Applied General Systems Theory Harper and Row London and New York First Edition 1974 Second Edition 1978 More than ten years after its publication this material still appears relevant to the main thrust of system design This book is dedicated to all those who are involved in changing the world for the better In a way we all are involved in system design from the city manager who struggles with the problems of mass transportation or the consolidation of a city and its suburbs to the social worker who tries to provide benefits to the urban poor It includes the engineer who designs the shuttle rockets It involves the politician engaged in drafting a bill to recycle containers or one to prevent pesticide contamination of our food The politician might even need system design to chart his or her own re election campaign
