Danger To Self On The Front Line With An Er Psychiatrist:

Danger to Self Paul R. Linde, 2010 Linde's *Danger to Self* is a warm candid and appealing account of being an emergency room psychiatrist Linde captures the non conformist hard boiled style of the psychiatrists who work in this setting Tanya Luhrmann author of *Of Two Minds* Linde illustrates academic points with his personal experiences quite deftly He comes across as a warm hearted thoughtful dedicated physician doing a difficult job as best he can His book offers an authentic behind the scenes look at how a psychiatrist thinks and practices Frank Huyler author of *The Blood of Strangers* In this provocative first person account *Danger to Self* psychiatrist Paul Linde takes us to the troubling front lines of America's mental healthcare crisis With one in three people experiencing some form of mental illness in their lifetimes this is a story that needs to be told Linde waves a red flag that can't be ignored Kemble Scott author of *SoMa* and *The Sower* *Danger to Self* is an excellent account of treating acute mental illness Dr Linde presents powerful stories of disturbed minds and circumstances of lives in upheaval due to psychosis addictions and despair It is also the story of the story of a psychiatrist who tends to those who are ill enough to warrant treatment in a psychiatric emergency room This is a well written book compassionate and well worth the reading Kay Redfield Jamison author of *An Unquiet Mind*

***Danger to Self* Paul R. Linde, 2010 Clinical internal medicine**

***Danger to Self* Paul Linde, 2010-01-07** The psychiatric emergency room a fast paced combat zone with pressure to match thrusts its medical providers into the outland of human experience where they must respond rapidly and decisively in spite of uncertainty and very often danger In this lively first person narrative Paul R. Linde takes readers behind the scenes at an urban psychiatric emergency room with all its chaos and pathos where we witness mental health professionals doing their best to alleviate suffering and repair shattered lives As he and his colleagues encounter patients who are hallucinating drunk catatonic aggressive suicidal high on drugs paranoid and physically sick Linde examines the many ethical legal moral and medical issues that confront today's psychiatric providers He describes a profession under siege from the outside health insurance companies the pharmaceutical industry government regulators and even patients rights advocates and from the inside biomedical and academic psychiatrists who have forgotten to care for the patient and have instead become checklist marking pill peddlers While lifting the veil on a crucial area of psychiatry that is as real as it gets *Danger to Self* also injects a healthy dose of compassion into the practice of medicine and psychiatry

Suicide Prohibition Thomas Szasz, 2011-10-12 In Western thought suicide has evolved from sin to sin and crime to crime to mental illness and to semilegal act A legal act is one we are free to think and speak about and plan and perform without penalty by agents of the state While dying voluntarily is ostensibly legal suicide attempts and even suicidal thoughts are routinely punished by incarceration in a psychiatric institution Although many people believe the prevention of suicide is one of the duties the modern state owes its citizens Szasz argues that suicide is a basic human right and that the lengths to which the medical industry goes to prevent it represent a deprivation of that right Drawing on his general theory of the myth of

mental illness Szasz makes a compelling case that the voluntary termination of one's own life is the result of a decision not a disease He presents an in depth examination and critique of contemporary antisuicide policies which are based on the notion that voluntary death is a mental health problem and systematically lays out the dehumanizing consequences of psychiatrizing suicide prevention If suicide be deemed a problem it is not a medical problem Managing it as if it were a disease or the result of a disease will succeed only in debasing medicine and corrupting the law Pretending to be the pride of medicine psychiatry is its shame

Conservatorship Alex V. Barnard, 2023-09-26 Winner 2024 Eliot Freidson Outstanding Publication Award Medical Sociology Section American Sociological Association Honorable Mention 2025 Best Book Award Sociology of Mental Health Section American Sociological Association Is involuntary psychiatric treatment the solution to the intertwined crises of untreated mental illness homelessness and addiction In recent years politicians and advocates have sought to expand the use of conservatorships a legal tool used to force someone deemed gravely disabled or unable to meet their needs for food clothing or shelter as a result of mental illness to take medication and be placed in a locked facility At the same time civil liberties and disability rights groups have seized on cases like that of Britney Spears to argue that conservatorships are inherently abusive Conservatorship is an incisive and compelling portrait of the functioning and failings of California's conservatorship system Drawing on hundreds of interviews with professionals policy makers families and conservatees Alex V Barnard takes readers to the streets where police encounter homeless people in crisis the locked wards where people receiving treatment are confined and the courtrooms where judges decide on conservatorship petitions As he shows California's state government has abdicated authority over this system leaving the question of who receives compassionate care and who faces coercion dependent on the financial incentives of for profit facilities the constraints of underresourced clinicians and the desperate struggles of families to obtain treatment for their loved ones This book offers a timely warning reforms to expand conservatorship will lead to more coercion but little transformative care until government assumes accountability for ensuring the health and dignity of its most vulnerable citizens

Mad Science Stuart A. Kirk, 2017-07-05 Winner of an honorable mention from the Society for Social Work and Research for Outstanding Social Work Book Award Mad Science argues that the fundamental claims of modern American psychiatry are based on misconceived flawed and distorted science The authors address multiple paradoxes in American mental health research including the remaking of coercion into scientific psychiatric treatment the adoption of an unscientific diagnostic system that controls the distribution of services and how drug treatments have failed to improve the mental health outcome When it comes to understanding and treating mental illness distortions of research are not rare misinterpretation of data is not isolated and bogus claims of success are not voiced by isolated researchers seeking aggrandizement This book's detailed analysis of coercion and community treatment diagnosis

and psychopharmacology reveals that these characteristics are endemic institutional and protected in psychiatry They are not just bad science but mad science This book provides an engaging and readable scientific and social critique of current mental health practices The authors are scholars researchers and clinicians who have written extensively about community care diagnosis and psychoactive drugs This paperback edition makes Mad Science accessible to all specialists in the field as well as to the informed public

Suicide John Bateson,2024-09-03 An urgent call to action on a rising and preventable trend Each year in the United States alone nearly 50 000 individuals die by suicide more than 1 2 million others attempt it John Bateson former executive director of a suicide prevention center examines this national tragedy from multiple angles while debunking common myths sharing demographic data and identifying risk factors and warning signs Suicide provides essential information about the current landscape surrounding suicide in the United States as well as strategies to prevent further tragedy Bateson emphasizes that the rise in suicide and attempted suicide is not only a mental health issue affecting individuals but also an urgent problem for society at large He discusses suicide in parks prisons and the military as well as assisted suicide suicide by cop and murder suicide In particular he details the stark relationship among guns drugs jump sites and suicide focusing on one of the most effective ways to prevent suicide restricting access to lethal means In addition to presenting practical information for identifying people at risk of suicide Bateson details important steps that individuals businesses and the government can take to end this public health problem

The Education of a Coroner John Bateson,2017-08-15 An entertaining Booklist account of the mysterious hair raising and heartbreaking cases handled by the coroner of Marin County California throughout his four decades on the job from high profile deaths and serial killers to inmate murders and Golden Gate Bridge suicides Marin County California is a study in contradictions Its natural beauty attracts celebrity residents and thousands of visitors every year yet the county also is home to San Quentin Prison one of the oldest and largest penitentiaries in the United States Marin ranks in the top one percent of counties nationwide in terms of affluence and overall health yet it is far above the norm in drug overdoses and alcoholism not to mention the large percentage of suicides that occur on the Golden Gate Bridge Ken Holmes worked in the Marin County Coroner s Office for thirty six years starting as a death investigator and ending as the three term elected coroner As he grew into the job one that is far different from the forensics we see on television Holmes learned a variety of skills from finding hidden clues at death scenes interviewing witnesses effectively managing bystanders and reporters and preparing testimony for court to how to notify families of a death with sensitivity and compassion He also learned about different kinds of firearms all types of drugs prescription and illegal and about certain unexpected and potentially fatal phenomena such as autoeroticism Complete with poignant anecdotes The Education of a Coroner is riveting and complex supremely entertaining reading material and a fascinating and wildly informative dive into the mysterious world of death and decay Kirkus Reviews

Becoming Dr. Q Alfredo Quiñones-Hinojosa,2011-10-01 Today he is known as Dr Q an internationally renowned neurosurgeon and

neuroscientist who leads cutting edge research to cure brain cancer But not too long ago he was Freddy a nineteen year old undocumented migrant worker toiling in the tomato fields of central California In this gripping memoir Alfredo Qui ones Hinojosa tells his amazing life story from his impoverished childhood in the tiny village of Palaco Mexico to his harrowing border crossing and his transformation from illegal immigrant to American citizen and gifted student at the University of California at Berkeley and at Harvard Medical School Packed with adventure and adversity including a few terrifying brushes with death Becoming Dr Q is a testament to persistence hard work the power of hope and imagination and the pursuit of excellence It s also a story about the importance of family of mentors and of giving people a chance
