lack of use Queen Seondeok of Korea who built an observatory in the 7th century that still stands today Wang Zhenyi who brought heliocentrism to China Margaret Huggins who perfected the techniques that allowed us to photograph stellar spectra and thereby completely changed the direction of modern astronomy and Hisako Koyama whose multi decade study of the sun s surface is as impressive a feat of steadfast scientific dedication as it is a rigorous and valuable treasure trove of solar data A History of Women in Astronomy and Space Exploration is not only a book however of those who study space but of those who have ventured into it from the fabled Mercury 13 whose attempt to join the American space program was ultimately foiled by betrayal from within to mythical figures like Kathryn Sullivan and Sally Ride who were not only pioneering space explorers but scientific researchers and engineers in their own rights aided in their work by scientists like Mamta Patel Nagaraja who studied the effects of space upon the human body and computer programmers like Marianne Dyson whose simulations prepared astronauts for every possible catastrophe that can occur in space Told through over 130 stories spanning four thousand years of humanity s attempt to understand its place in the cosmos A History of Women in Astronomy and Space Exploration brings us at last the full tale of women s evolution from instrument makers and calculators to the theorists administrators and explorers who have while receiving astonishingly little in return given us quite literally the universe

Galileo Mario Livio, 2021-05-25 An intriguing and accessible Publishers Weekly interpretation of the life of Galileo Galilei one of history s greatest and most fascinating scientists that sheds new light on his discoveries and how he was challenged by science deniers We really need this story now because we re living through the next chapter of science

denial Bill McKibben Galileo's story may be more relevant today than ever before At present we face enormous crises such as minimizing the dangers of climate change because the science behind these threats is erroneously questioned or ignored Galileo encountered this problem 400 years ago His discoveries based on careful observations and ingenious experiments contradicted conventional wisdom and the teachings of the church at the time Consequently in a blatant assault on freedom of thought his books were forbidden by church authorities Astrophysicist and bestselling author Mario Livio draws on his own scientific expertise and uses his gifts as a great storyteller The Washington Post to provide a refreshing perspective Booklist into how Galileo reached his bold new conclusions about the cosmos and the laws of nature A freethinker who followed the evidence wherever it led him Galileo was one of the most significant figures behind the scientific revolution He believed that every educated person should know science as well as literature and insisted on reaching the widest audience possible publishing his books in Italian rather than Latin Galileo was put on trial with his life in the balance for refusing to renounce his scientific convictions He remains a hero and inspiration to scientists and all of those who respect science which as Livio reminds us in this admirably clear and concise The Times London book remains threatened everyday Fluke Brian Klaas, 2025-01-21 In Fluke social scientist Brian Klaas takes a deep dive into the phenomenon of random chance and the chaos it can sow taking aim at most people's neat and tidy version of reality The book's argument is that we willfully ignore a bewildering truth but for a few small changes our lives and our societies could be radically different Offering an entirely new lens Fluke explores how our world really works driven by strange interactions and apparently random events Drawing on social science chaos theory history evolutionary biology and philosophy Klaas provides a fresh look at why things happen all while providing lessons on how we can live smarter be happier and lead more fulfilling lives
