Darwin's Dreampond Drama On Lake Victoria:

Darwin's Dreampond Tijs Goldschmidt, 1998 Darwin's Dreampond tells the evolutionary story of the extraordinary furu and the battlefield leading to extinction Tijs Goldschmidt skillfully blends a masterful discussion of the principles of neo Darwinian evolution and speciation with a history of Lake Victoria's ecosystem The science unfolds in the context of the engaging first person narrative of Goldschmidt's adventures and misadventures as a field researcher An astute observer and a clear and witty writer he warmly portrays the colors and textures of the landscapes and the lives of the local people as he interacts with them during the course of his fieldwork Life Out of Bounds Chris Bright, 1998 Bright a research assistant at the environmental educational non profit organization Worldwatch Institute describes and evaluates the spread of alien or exotic organisms that are destroying ecosystems around the world Annotation copyrighted by Book News Inc Portland OR

A History of the Water Hyacinth in Africa Jeremiah Mutio Kitunda, 2017-11-17 Humans and animals are not the only creatures that migrate Plants also do This book is a comprehensive and analytical account of the migration of an Old World plant water hyacinth also known to botanists as *Eichhornia Crassipes* from the Amazon Basin and surrounding areas to Africa through human agency from about 1800 to the present As an integrative work which benefits from methodologies and conceptual approaches drawn from limnology botany biology geography history ecology and other social sciences and humanities the book further explores the political economic and ecological consequences of the spread of water hyacinth from its native habitat through European botanical gardens to Africa rivers lakes dams and wetlands In part as a narrative of Western tinkering with African ecologies gone awry the study has strong lessons for environmental historians and social scientists as well as contemporary foundations aid workers development experts and African governments Although it may appear to be a micro history of a single plant water hyacinth it illuminates broader issues in the history of the modern environment in Africa and similar studies worldwide This study is primarily rooted on the histories of colonialism bioinvasion environmental realities and experiences in Africa The highly visible pathways of hyacinth's spread across international frontiers along watercourses and communication networks means that not only is this a trans boundary environmental affair but one which directly involves bilateral relations between African states **The Man Who Saved Sea Turtles** Frederick
