

## Loading Unit Onto Trailer

The proper method of loading the unit onto a tilt bed trailer is shown in Figure 40. If a stationary bed trailer is used and the unit must be driven up a ramp, back the unit up the ramp. Always have the backhoe in transport position when loading or unloading.

Figure 40

## BACKHOE REMOVAL

1. Park the tractor on a hard level surface and lower the loader bucket to the ground.
2. Start the engine and form a tripod as shown in Figure 41. Lower the stabilizers until they just touch the ground.

**NOTE:** The stabilizers have a two position pivot. The backhoe can be removed with the stabilizers in either position.

Figure 41 - Backhoe In Tripod Position

3. At the rear of the tractor there are two tension rod assemblies. Loosen the nut on top of each rod, Figure 42.

Figure 42 - Tension Rod Assembly

4. Loosen the lower nut on each tension rod. Remove the retaining bolts or pins from the upper mounting pins. Disconnect the dipper light wire if so equipped.
5. Start the engine and raise or lower the boom as required (which tips the backhoe mounting frame in or out) to remove backhoe weight from the upper mounting pins and drive the pins out. It may be necessary to use the stabilizers to level the mounting frame.
6. With the stabilizers, raise the backhoe until the lower mounting studs are clear of the lower support arms.
