

The book cover features a vibrant orange background at the top and bottom, separated by a large, dynamic image of a blue ocean wave. The wave is captured in a close-up, showing the swirling motion of the water and the white foam of the crest. The image is framed by sharp, diagonal geometric shapes in shades of blue and orange, creating a modern, abstract aesthetic.

Creative Insubordination In Brazilian Mathematics Education Research:

Creative Insubordination in Brazilian Mathematics Education Research Beatriz Silva D'Ambrosio, Celi Espasandin Lopes, 2015-05-16 This book presents examples of the scholarship of Brazilian mathematics educators. The authors who contributed to this collection situate their work within the construct of creative insubordination. With this collection we hope to increase the participation of Brazilian scholars in the international conversations of research on mathematics teaching and learning.

Ethnomathematics and its Diverse Approaches for Mathematics Education Milton Rosa, Lawrence Shirley, Maria Elena Gavarrete, Wilfredo V. Alangui, 2017-07-25 This book addresses numerous issues related to ethnomathematics and diverse approaches to it in the context of mathematics education. To help readers better understand the development of ethnomathematics, it discusses its objectives and assumptions with regard to promoting an ethics of respect, solidarity, and cooperation across and for all cultures. In turn, the book addresses a range of aspects including pedagogical action, culturally relevant pedagogy, innovative approaches to ethnomathematics, and the role of ethnomathematics in mathematics education. Ethnomathematics offers educators a valuable framework for transforming mathematics so that it can more actively contribute to realizing the dream of a just and humane society. As such, its primary goal is to forge mathematics into a powerful tool to help people create a society characterized by dignity for all and in which iniquity, arrogance, violence, and bigotry have no place. *Ubiratan D'Ambrosio and Mathematics Education* Marcelo C.

Borba, Daniel C. Orey, 2023-06-24 This edited volume is written in memoriam of Professor Emeritus Ubiratan D'Ambrosio 1932-2021, who was a well-known Brazilian mathematics educator and historian of mathematics. This book explores the diverse facets of D'Ambrosio's work as well as his legacy and the later adaptation of his ideas around the globe. It starts with a preface written by his son Alexandre D'Ambrosio, who shares his personal experiences growing up with this father and his love for discovery. The book is then divided into four sections: Past and Future, Ubi's Way of Seeing Education in the Present, Roots of Ethnomathematics, and Ethnomathematics in Action. Trends in Ethnomathematics. It features diverse points of view and experiences that explore mathematics and culture from researchers in the Americas, Africa, Europe, and South Asia. Chapters range from personal explorations of D'Ambrosio's impact to broader views of his research and work. This book forms part of the growing understanding of Ubiratan D'Ambrosio's life, research, and the legacy he has left for millions of researchers, students, and teachers worldwide. This book is appealing to anyone involved in mathematics education research as well as those interested in the history and future of mathematics education.

Mathematics Education in Brazil Alessandro Jacques Ribeiro, Lulu Healy, Rute Elizabete de Souza Rosa Borba, Solange Hassan Ahmad Ali Fernandes, 2018-08-14 This book presents for the first time in English the state of the art of Mathematics Education research in Brazil, a country that has the strongest community in this field in Latin America. Edited by leading researchers in the area, the volume provides the international academic community a summary of the scientific production of the thirteen working groups of the Brazilian

Society of Mathematics Education SBEM the national scientific society that brings together researchers teachers students and other professionals of the area These working groups meet every three years at the International Seminar of Mathematics Education SIPEM and cover the following topics Mathematics Education in the Early Years and Primary Education Y1 Y5 Mathematics Education in the Middle School Y6 Y9 Mathematics Education in the High School Y10 Y12 Mathematics Education at the University level History of Mathematics Culture and Mathematics Education Digital Technologies and Distance Education Teacher Education Assessment and Mathematics Education Cognitive and Linguistic Processes in Mathematics Education Mathematical Modeling Philosophy of Mathematics Education Teaching Probability and Statistics and Difference Inclusion and Mathematics Education Each chapter of the book presents an overview of the production of a working group and they are all preceded by an introduction by professor Ubiratan D Ambrosio one of the pioneers of Mathematics Education in Brazil Mathematical Modelling Programs in Latin America Milton Rosa, Francisco Cordero, Daniel Clark Orey, Pablo Carranza, 2022-07-06 This book is about the unique sophisticated and rigorous study of mathematics in Latin America developed over centuries of cultural exchange between Europe North and South America More specifically the book explores the tradition of mathematical modelling introduced a century ago This modelling was adapted to assist members of distinct communities to draw information about their own realities through the elaboration of representations which generate mathematical knowledge that deals with creativity and invention The book provides empirical evidence that a category of mathematical modelling developed in Latin America assesses the horizontal and reciprocal relations between mathematics school non school contexts and the real world These relations provide an epistemological and ontological change where mathematical knowledge of the others is recognized on a horizontal plane Further they oblige mathematics teachers and students to understand as a community of knowledge that builds their own mathematical categories of their environment governed by the reciprocal relationships between academic knowledge and functional knowledge The dimensions of the relationships make up a frame of reference that guides educational change in mathematics The book presents an inquiry based approach of three Latin American modelling programs ethnomodelling transversality of knowledge and reasoned decision making Each one with its respective theoretical and methodological foundations related to ethnomathematics and mathematical modelling socioepistemology and the attribution of meaning to learning Undoubtedly the three mathematical modelling programs independently provide educational gains each with its levels of specificity and loyal to its philosophical theoretical and methodological principles However the book places them together organized by axes to define a corpus of mathematical knowledge that envisions profound educational change through the development of different approaches of mathematical modelling The authors of the 18 chapters in this book who represent the diversity of Latin America are from eight countries Argentina Brazil Chile Colombia Costa Rica Cuba Ecuador Honduras and Mexico They were invited to share their ideas perspectives and discuss investigations that represent a rich

sample of three Latin American perspectives on mathematical modelling Lines of Inquiry in Mathematical Modelling Research in Education Gloria Ann Stillman, Jill P. Brown, 2019-05-16 This open access book is based on selected presentations from Topic Study Group 21 Mathematical Applications and Modelling in the Teaching and Learning of Mathematics at the 13th International Congress on Mathematical Education ICME 13 held in Hamburg Germany on July 24-31 2016 It contributes to the theory research and teaching practice concerning this key topic by taking into account the importance of relations between mathematics and the real world Further the book addresses the balancing act between developing students modelling skills on the one hand and using modelling to help them learn mathematics on the other which arises from the integration of modelling into classrooms The contributions prepared by authors from 9 countries reflect the spectrum of international debates on the topic and the examples presented span schooling from years 1 to 12 teacher education and teaching modelling at the tertiary level In addition the book highlights professional learning and development for in service teachers particularly in systems where the introduction of modelling into curricula means reassessing how mathematics is taught Given its scope the book will appeal to researchers and teacher educators in mathematics education as well as pre service teachers and school and university educators **Critical Mathematics Education** Ole

Skovsmose, 2023-02-28 The book Critical Mathematics Education provides Ole Skovsmose's recent contribution to the further development of critical mathematics education It gives examples of learning environments which invite students to engage in investigative processes It discusses how mathematics can be used for identifying cases of social injustice and it shows how mathematics itself can become investigated critically Critical Mathematics Education addresses issues with respect to racism oppression erosion of democracy sustainability formatting power of mathematics and banality of mathematical expertise It explores relationships between mathematics ethics crises and critique Ole Skovsmose has published what I might call his magnum opus a 280 page synthesis and extension of his work simply called Critical Mathematics Education In it he brings together his deep philosophical understanding and theorisation of mathematics itself mathematics in society from a critical perspective and mathematics in the teaching learning and formation of students For the mathematics education community especially those concerned with social justice philosophy critical pedagogy and the nature of mathematics this is likely to be the publishing event of the year In this book he offers something lacking in the literature a philosophy of applied
