Creatures Of Empire How Domestic Animals Transformed Early America:

Creatures of Empire Virginia DeJohn Anderson, 2006 Book Review *Creaturely Theology* David Clough, 2013-02-11

Creaturely Theology is a ground breaking scholarly collection of essays that maps out the agenda for the future study of the theology of the non human and the post human A wide range of first rate contributors show that theological reflection on non human animals and related issues are an important though hitherto neglected part of the agenda of Christian theology and related disciplines The book offers a genuine interdisciplinary conversation between theologians philosophers and scientists and will be a standard text on the theology of non human animals for years to come Contributors include Esther D Reed Exeter Rachel Muers Leeds Stephen Clark Liverpool Neil Messer Lampeter Peter Scott Manchester Michael Northcott Edinburgh Christopher Southgate Exeter Humans, Animals, and U.S. Society in the Long Nineteenth Century: A

Documentary History Dominik Ohrem, 2025-11-18 Volume III hones in on the relations between humans and domesticated animals in U S society illuminating how these relations were integral to key developments of the long nineteenth century A first section explores the role of domesticated animals in what for most of the nineteenth century remained a predominantly agrarian world albeit one undergoing significant change focussing on the labour and products that could be extracted from animal bodies the education of working animals contemporary attempts at improving animal breeds to increase agricultural productivity and market value the rise of veterinary medicine and other topics The second section demonstrates that the transportation revolution of the antebellum decades notwithstanding animals remained essential for moving around goods and people in both rural areas and the growing U S cityscapes where horses powered everything from carriages to streetcars as well as in other nineteenth century contexts that relied on equine bovine and sometimes canine traction A third and final section is centred on domesticated animals in entertainment and competitive settings ranging from the prestigious if embattled sport of Thoroughbred horse racing to pigeon fancying and the brutal spectacles of dog and cockfighting which quickly became the target of a spirited post Civil War anticruelty movement **Feral Animals in the American South**

Abraham Gibson, 2016-08-30 This book retells American southern history from feral animals perspective examining social cultural and evolutionary consequences of domestication and feralization **Civilised by beasts** Juliana

Adelman, 2020-10-27 *Civilised by beasts* tells the story of nineteenth century Dublin through human animal relationships It offers a unique perspective on ordinary life in the Irish metropolis during a century of significant change and reform At its heart is the argument that the exploitation of animals formed a key component of urban change from municipal reform to class formation to the expansion of public health and policing It uses a social history approach but draws on a range of new and underused sources including archives of the humane society and the zoological society popular songs visual ephemera and diaries The book moves chronologically from 1830 to 1900 with each chapter focusing on specific animals and their relationship to urban changes It will appeal to anyone fascinated by the history of cities the history of Dublin or the history of

Ireland **Atlantic Environments and the American South** Thomas Blake Earle, D. Andrew Johnson, 2020-03-01 There is clear overlap in interests and influences for the fields of Atlantic environmental and southern history but scholarship in them has often advanced on parallel tracks This anthology places itself at the intersection pushing for a new confluence Editors Thomas Blake Earle and D Andrew Johnson provide a lucid introduction to this collection of essays that brings these disciplines together With this volume historians explore crucial insights into a self consciously Atlantic environmental history of the American South touching on such topics as ideas about slavery gender climate colonial ecological revolution manipulation of the landscape infrastructure resources and exploitation By centering this project on a region the American South defined as the southeastern reaches of North America and the Caribbean the authors interrogate how European colonizers Native Americans and Africans interacted in and with the sub tropics a place foreign to Europeans Challenging the concepts of Atlantic and southern and their intersection with environments is a discipline defining strategy at the leading edge of emerging scholarship Taken collectively this book should encourage more readers to reimagine this region its time periods climate s and ecocultural networks *Landscape and Identity in North America's Southern Colonies from 1660 to 1745* Catherine Armstrong, 2016-04-22 Through an analysis of textual representations of the American landscape this book looks at how North America appeared in books printed on both sides of the Atlantic between the years 1660 and 1745 A variety of literary genres are examined to discover how authors described the landscape climate flora and fauna of America particularly of the new southern colonies of Carolina and Georgia Chapters are arranged thematically each exploring how the relationship between English and American print changed over the 85 years under consideration Beginning in 1660 with the impact of the Restoration on the colonial relationship the book moves on to show how the expansion of British settlement in this period coincided with a dramatic increase in the production and consumption of the printed word and the further development of religious and scientific explanations of landscape change and climactic events This in turn led to multiple interpretations of the American landscape dependent on factors such as whether the writer had actually visited America or not differing purposes for writing growing imperial considerations and conflict with the French Spanish and Natives The book concludes by bringing together the three key themes how representations of landscape varied depending on the genre of literature in which they appeared that an author s perceived self definition as English resident American visitor or American resident determined his understanding of the American landscape and finally that the development of a unique American identity by the mid eighteenth century can be seen by the way American residents define the landscape and their relationship to it **Homelands and Empires** Jeffers Lennox, 2017-01-01 In this deeply researched and engagingly argued work Jeffers Lennox reconfigures our general understanding of how Indigenous peoples imperial forces and settlers competed for space in northeastern North America before the British conquest in 1763 [Animals in the Anthropocene](#) Edited by the Human Animal Research Network Editorial Collective, 2015-06-16 Much of the discussion on the Anthropocene

has centred upon anthropogenic global warming and climate change and the urgency of political and social responses to this problem. *Animals in the Anthropocene* critical perspectives on non human futures shows that assessing the effects of human activity on the planet requires more than just the quantification of ecological impacts towards the categorisation of geological eras. It requires recognising and evaluating a wide range of territories and terrains full of non human agents and interests and meanings exposed to the profound forces of change that give their name to the Anthropocene. It is from the perspective of the animal question asking how best to think and live with animals that *Animals in the Anthropocene* seeks to interrogate the Anthropocene as a concept, discourse and state of affairs. The term Anthropocene is a useful device for drawing attention to the devastations wreaked by anthropocentrism and advancing a relational model for human and non human life. The effects on animals of human political and economic systems continue to expand and intensify in numerous domains and in ways that not only cause suffering and loss but that also produce new forms of life and alter the very nature of species. As anthropogenic change affects the more than human world in innumerable ways we must accept responsibility for the damage we have caused and the debt we owe to non human species. **Speculation Nation** Michael A. Blaakman, 2023-09-19

During the first quarter century after its founding the United States was swept by a wave of land speculation so unprecedented in intensity and scale that contemporaries and historians alike have dubbed it a mania. In *Speculation Nation* Michael A. Blaakman uncovers the revolutionary origins of this real estate bonanza, a story of ambition, corruption, capitalism and statecraft that stretched across millions of acres from Maine to the Mississippi and Georgia to the Great Lakes. Patriot leaders staked the success of their revolution on the seizure and public sale of Native American territory. Initially they hoped that fledgling state and national governments could pay the hefty costs of the War for Independence and extend a republican society of propertied citizens by selling expropriated land directly to white farmers. But those democratic plans quickly ran aground of a series of obstacles including an economic depression and the ability of many Native nations to repel U.S. invasion. Wily merchants, lawyers, planters and financiers rushed into the breach. Scrambling to profit off future expansion they lobbied governments to convey massive tracts for pennies, an acre hounded revolutionary veterans to sell their land bounties for a pittance and marketed the rustic ideal of a yeoman's republic, the early American dream, while waiting for land values to rise. When the land business crashed in the late 1790s scores of land mad speculators found themselves imprisoned for debt or declaring bankruptcy. But through their visionary schemes and corrupt machinations U.S. speculators and statesmen had spawned a distinctive and enduring form of settler colonialism, a financialized frontier which transformed vast swaths of contested land into abstract commodities. *Speculation Nation* reveals how the era of land mania made Native dispossession a founding premise of the American republic and ultimately rooted the United States empire of liberty in speculative capitalism.
