The Altruistic Gene - Revisited: S.T. Evensen, 2018-12-14 This book replaces a fiction 2005 in the Altruistic Gene trilogy and covers what really happened to an industrial family in 2005 2018 It signals faith in the power of collaboration to attain social impact by effective altruism also setting new standards benefiting others The book offers perspectives on business institutional as well as societal development It also relates historic values of peripheral isles and coastal areas in Northern Europe namely gender parity and the right to resist by freedom of speech in a direct democracy protected by common law Telling about the actuality of these values that is the purpose and rationale of the book Part 1 of the book follows the elders of the family from 2005 until 2011 The elders foresaw structural changes as well as crises of trust caused by elite circulation collusion and fragmentation of decision making benefiting special interests They chose to carry through a transition of power to their children whom had become stepparents of two nephews victims of their biological parents high and deadly profiles A primary objective of the transition was to protect the family and reduce its profile in the media and markets by divesting holdings in traditional industries The elders wanted the stepparents to prepare the next generation for an early transition of power and they involved the family's confidants as mentors They also financed a task force for security and intelligence with a hidden agenda Part 2 and 3 of the book follow the endeavors of the next generation during 2012 2018 The family's values made the next generation take on responsibilities with a strong sense of duty The two adopted sons sought innovation and experiences in both the south and north of Europe where they were faced with the causes and later repercussions of economic crises in 2007 2009 The collusion resulted in crises of trust and debt Their findings on deliberative transparent

pluralism Good governance requires agility enterprise and ethics as well as collaboration fair play and predictability They pursued ideas benefiting the atomist the individual without influence alone by impartiality coresponsibility empowerment and collaboration They saw the need to reinvent activities of trustees fiduciaries and facilitate effective basic infrastructure benefiting also small and mid-sized enterprises SMEs without names in the markets and media Therefore they decided to promote and participate in a social enterprise for impact investing organized as an innovative collaborative value network CVN A CVN can reach into the real economies of maritime regions where needs of owners enterprisers and investors are similar everywhere The book draws a circle with an unexpected end one of the adopted sons encounters a young woman with a surprise connection to the death of his biological parents An early transition starts and a CVN approach for impact investing is set in motion New ways are commenced e.g. efforts to stop favoring of special interests as well as to draft a pact on altruism against obscurantism Telling about these endeavors ends the author's book series on pluralism ethics and enterprise The draft pact on altruism is not important but the idea of such a draft is when spread in growing circles This book and Nordic Model Analyses 2016 invite readers to participate in an anthology for building alternative visions of Nordic and similar societal models by combining pluralism ethics enterprise and welfare as well as gender parity secularity diversity and ecumenism Cf www.bankier.co

Nordic Model Analyses: S. T. Evensen, 2016-05-31 The crux of this book is that it can help build Vision and processes for improvements by stances on positive development syndromes versus special interests scenarios That may even open up to serendipity In contrast there are specific econometric models and adjacent historic data which lack contact with today's diverse events of real life i.e. behavioural aspects and the risk of changes It is much too easy to build a scenario based on game theory and/or accepting others' algorithm based on interpretation of behaviour and risk of changes defined by so-called elasticities By embracing the financial economy a ring of well-positioned econometricians has gained power Worldwide especially in small Nordic countries where seeking consensus based on historic data is a common practice New insight tends to arrive too late unforeseen events will continue to surprise Such countries are easily exploited by elite circulation and fragmentation of decision making benefiting special interests The GAP between the financial and the real economy will grow Hidden agendas and asymmetric information will thrive The results are losses of resources plus disintegration for a large majority of enterprises and citizens One may say that the demise of the old-fashioned Nordic model is embedded in the gullibility of its inmates They look up to authorities and lack the needed oversight agility and sense of urgency to adapt and change To rock the boat and reinvent the Nordic model is much needed It can be attained by focusing on the real economy and the behaviour of its inmates
