Intelligent Algorithms for Packing and Cutting Problem Yunqing Rao,Qiang Luo,2022-10-03 This book investigates in detail the two dimensional packing and cutting problems in the field of operations research and management science It introduces the mathematical models and intelligent solving algorithms for these problems as well as their engineering applications Most intelligent methods reported in this book have already been applied in reality which can provide reference for the engineers The presented novel methods for the two dimensional packing problem provide a new way to solve the problem for researchers interested in operations research or computer science This book also introduces three new variants of packing problems and their solving methods which offer a different research direction The book is intended for undergraduate and graduate students who are interested in the solving methods for packing and cutting problems researchers investigating the application of intelligent algorithms scientists studying the theory of the operations research and CAM software developers working on integration of packing and cutting problem *Proceedings of World Conference on Information Systems for Business Management* Andres Iglesias,Jungpil Shin,Bharat Patel,Amit Joshi,2024-02-28 This book includes selected papers presented at World Conference on Information Systems for Business Management ISBM 2023 held in Bangkok Thailand during September 7 8 2023 It covers up to date cutting edge research on data science information systems infrastructure and computational systems engineering systems business information systems and smart secure systems **On the Cutting Edge of Technology** ,1993 An introduction to the world of the future this book covers 14 topics of various areas of new technology artificial intelligence genetic programming nanotechnology smart materials 3D animation with ray tracing virtual reality morphing fractals fuzzy logic chaos 3D sound and interactive entertainment 4 color

Applied Innovations in Information and Communication Technology Stanislav Dovgyi,Eduard Siemens,Larysa Globa,Oleh Kapiika,Oleksandr Stryzhak,2025-04-17 This book highlights the most important research areas in Information and Communication Technologies and their impact on digital society and environment sustainable development namely the research in fields of information and communication technologies artificial intelligence in ICT data analytics security of data and services reducing energy consumption in the digital environment and mathematical modeling for practical and research tasks in communication and data processing fields provided by various groups of researchers from Germany and Ukraine in cooperation with scientists from different countries The presented studies contain a discussion on the use of artificial intelligence in particular methods of deep learning practical implementation of the Internet of Things IoT the modern study of ECO monitoring systems research in fields of mathematical modeling in applied problems The book focuses on the basics of information and analytical activities in the digital global space to providing broadband Internet access without decreasing the quality of experience QoE level improving services providing and system architecture for SDN The study of modern communication and information technologies contains original works dealing with many aspects of their improvement and

use for forecasting social and environment sustainable development based on global information space as well as research that contains actual papers which show some effective technological solutions that can be used for the implementation of novel cloud infrastructure and radio electronics systems These results can be used in the implementation of novel systems and to promote the exchange of information in e societies Given its scope the book offers a valuable resource for scientists lecturers specialists working at enterprises graduate and undergraduate students who engage with problems in Information and Communication Technologies as well as aspects of society and environment sustainable development

Applied Mechanics Reviews, 1987 **Springer Handbook of Robotics** Bruno Siciliano, Oussama Khatib, 2016-07-27 The second edition of this handbook provides a state of the art overview on the various aspects in the rapidly developing field of robotics Reaching for the human frontier robotics is vigorously engaged in the growing challenges of new emerging domains Interacting exploring and working with humans the new generation of robots will increasingly touch people and their lives The credible prospect of practical robots among humans is the result of the scientific endeavour of a half a century of robotic developments that established robotics as a modern scientific discipline The ongoing vibrant expansion and strong growth of the field during the last decade has fueled this second edition of the Springer Handbook of Robotics The first edition of the handbook soon became a landmark in robotics publishing and won the American Association of Publishers PROSE Award for Excellence in Physical Sciences Mathematics as well as the organization's Award for Engineering Technology The second edition of the handbook edited by two internationally renowned scientists with the support of an outstanding team of seven part editors and more than 200 authors continues to be an authoritative reference for robotics researchers newcomers to the field and scholars from related disciplines The contents have been restructured to achieve four main objectives the enlargement of foundational topics for robotics the enlightenment of design of various types of robotic systems the extension of the treatment on robots moving in the environment and the enrichment of advanced robotics applications Further to an extensive update fifteen new chapters have been introduced on emerging topics and a new generation of authors have joined the handbook's team A novel addition to the second edition is a comprehensive collection of multimedia references to more than 700 videos which bring valuable insight into the contents The videos can be viewed directly augmented into the text with a smartphone or tablet using a unique and specially designed app Springer Handbook of Robotics Multimedia Extension Portal <http://handbookofrobotics.org>
