A Generation of Excellence Robert Craig Brown, 2007-01-01 The Canadian Institute for Advanced Research originated at the University of Toronto in the early 1980s Since that time it has gone from a small independent centre to an important and revered institution with a significant role in the study of sciences social sciences and humanities in Canada A Generation of Excellence is a detailed history of the CIAR from its humble beginnings to its ascension as one of the most important research organizations in the country Beginning in the summer of 1982 with the CIAR merely a conception in the minds of senior scholars at the University of Toronto Craig Brown takes us through the process of realization detailing the early years of the Institute under the presidency of Dr Fraser Mustard From early struggles to eventual triumphs Brown examines the CIAR's pursuit of an ethos to explore fundamental issues in the social sciences and humanities by funding teams of researchers showing how success was painstakingly achieved The rise of the CIAR is deftly illustrated by pairing its earliest projects with the twentieth anniversary Congress held in 2002 in honour of the Institute and two decades of research A Generation of Excellence tells the story of one of the country's most remarkable institutions *Arthur E. Haas - The Hidden Pioneer of Quantum Mechanics* Michael Wiescher, 2021-09-23 The book highlights the personal and scientific struggles of Arthur Erich Haas 1884 1941 an Austrian Physicist from a wealthy Jewish middle class family whose remarkable accomplishments in a politically hostile but scientifically rewarding environment deserve greater recognition Haas was a fellow student of both Lise Meitner and Erwin Schrödinger and was also one of the last doctoral students of Ludwig Boltzmann Following Boltzmann's suicide Haas was forced to submit a more independent doctoral thesis in which he postulated new approaches in early quantum theory actually introducing the idea of the Bohr radius before Niels Bohr It is the lost story of a trailblazer in the fields of quantum mechanics and cosmology a herald of nuclear energy and applications of modern science This biography of Haas is based on new and previously unpublished family records and archived material from the Vienna Academy of Science and the University of Notre Dame which the author has collected over many years From his analysis of the letters documents and photos that rested for nearly a century in family attics and academic archives Michael Wiescher provides a unique and detailed insight into the life of a gifted Jewish physicist during the first half of the twentieth century It also sheds light on the scientific developments and thinking of the time It appeals not only to historians and physicists but also general readers All appreciate the record of Haas interactions with many of the key figures who helped to found modern physics **An Immigrant's Journey into the Cosmos** Dr. N Y Misconi, 2015-05-19 Astronaut Dr Buzz Aldrin commended the author citing his proposal to transform the Space Shuttle fleet before retiring it into a space tourism fleet which would generate profits for NASA Dr Donald Brownlee Director of NASA's STARDUST Mission that flew to comet Wild 2 said this about the author One of Dr Misconi's most significant publications was his 1979 Nature paper on streaming of interstellar grains into the solar system The paper predicted that interstellar dust should stream into the solar

system from the direction the then detectable interstellar gas and it also described the interaction of the extrasolar particles with the solar wind and the IP Interplanetary magnetic field The paper was timely and highly prophetic as the stream of interstellar dust was detected just a few years later by instruments on the Ulysses and Galeleo spacecraft Dr Seung Soo Hong former chair of the Astronomy Department at Seoul National University in Seoul South Korea said this about the author I still remember in one of those brain storming sessions he suggested to fire a big gun from a satellite to a nearby asteroid and to observe the scattered light of the Sun and man made source by the dust excavated from the asteroid surface The Space Astronomy Laboratory team couldn t materialize the idea then But to think back this was a brilliant idea with which one can characterize the nature of ligorith particles for a reasonable price *36 Arguments for the Existence of God* Rebecca Goldstein,2011-02-01 From the author of *The Mind Body Problem* a witty and intoxicating novel of ideas that plunges into the great debate between faith and reason At the center is Cass Seltzer a professor of psychology whose book *The Varieties of Religious Illusion* has become a surprise best seller Dubbed the atheist with a soul he wins over the stunning Lucinda Mandelbaum the goddess of game theory But he is haunted by reminders of two people who ignited his passion to understand religion his teacher Jonas Elijah Klapper a renowned literary scholar with a suspicious obsession with messianism and an angelic six year old mathematical genius heir to the leadership of an exotic Hasidic sect Hilarious heartbreaking and intellectually captivating *36 Arguments* explores the rapture and torments of religious experience in all its variety **The Whole Shebang** Timothy Ferris,1998-07-06 Summarizes what science has learned about the universe as of the end of the twentieth century and offers predictions about what may emerge in the near future **Home is Where the Wind Blows** Fred Hoyle,Stanley Gill,2015-06-15 One of this century s most eminent scientist offers a revealing and charming account of his life and work Mathematician physicist astronomer cosmologist and originator of the term the Big Bang Sir Fred has always been ready and able to challenge established thinking One of this century s most eminent scientist offers a revealing and charming account of his life and work Mathematician physicist astronomer cosmologist and originator of the term the Big Bang Sir Fred has always been ready and able to challenge established thinking *The Dissidents* Peter Reddaway,2020-02-11 The nearly forgotten story of Soviet dissidents It has been nearly three decades since the collapse of the Soviet Union enough time for the role that the courageous dissidents ultimately contributed to the communist system s collapse to have been largely forgotten especially in the West This book brings to life for contemporary readers the often underground work of the men and women who opposed the regime and authored dissident texts known as samizdat that exposed the tyrannies and weaknesses of the Soviet state both inside and outside the country Peter Reddaway spent decades studying the Soviet Union and got to know these dissidents and their work publicizing their writings in the West and helping some of them to escape the Soviet Union and settle abroad In this memoir he captures the human costs of the repression that marked the Soviet state focusing in particular on Pavel Litvinov Larisa Bogoraz General Petro Grigorenko Anatoly Marchenko

Alexander Podrabinek Vyacheslav Bakhmin and Andrei Sinyavsky His book describes their courage but also puts their work in the context of the power struggles in the Kremlin where politicians competed with and even succeeded in ousting one another Reddaway's book takes readers beyond Moscow describing politics and dissident work in other major Russian cities as well as in the outlying republics Skills Policy in Britain and the Future of Work Tom Bewick,2025-10-29 What role did Winston Churchill play in excluding comprehensive schooling from the 1944 Education Act What was the failed promise of technical education in the post war period Why did Margaret Thatcher manipulate government training programmes before the 1987 General Election And what was the fallout of Tony Blair's government over lifelong learning In this book Tom Bewick examines the evolution of UK skills policy from the 1881 Royal Commission on Technical Instruction to the present day revealing how shifting political ideologies have shaped workforce development He applies a chronological historical political policy analysis framework to explain the four training states of skills policy and workforce development between the 1940s and the 2020s The interventionist state 1939 1979 The laissez faire state 1980 1988 Localism and the devolved states 1989 2010 The technocratic state 2010 present Traversing time periods to uncover political and economic driving forces this book challenges conventional thinking and offers insights into how future skills policies can be more effective **People Of The Tiger - USA Edition** Wayne Edward Clarke,2010-09 When we've solved the great problems of humanity how will we integrate those who are prone to violence What if the system is then disrupted by the introduction of a genetically engineered human Join us for action and adventure as these questions are answered in this sci fi blockbuster Tika has been altered in many ways she doesn't know how or why and she struggles to learn her destiny The Book Nobody Read Owen Gingerich,2009-05-26 After three decades of investigation and after traveling hundreds of thousands of miles across the globe from Melbourne to Moscow Boston to Beijing Gingerich has written an utterly original book built on his experience and the remarkable insights gleaned from examining some 600 copies of De revolutionibus He found the books owned and annotated by Galileo Kepler and many other lesser known astronomers whom he brings back to life which illuminate the long reluctant process of accepting the Sun centered cosmos and highlight the historic tensions between science and the Catholic Church He traced the ownership of individual copies through the hands of saints heretics scalawags and bibliomaniacs He was called as the expert witness in the theft of one copy witnessed the dramatic auction of another and proves conclusively that De revolutionibus was as inspirational as it was revolutionary Part biography of a book part scientific exploration part bibliographic detective story The Book Nobody Read recolors the history of cosmology and offers new appreciation of the enduring power of an extraordinary book and its ideas
