Counterterrorism And Open Source Intelligence Lecture Notes In Social Networks:

Counterterrorism and Open Source Intelligence Uffe Wiil, 2011-06-27 Since the 9 11 terrorist attacks in the United States serious concerns were raised on domestic and international security issues Consequently there has been considerable interest recently in technological strategies and resources to counter acts of terrorism In this context this book provides a state of the art survey of the most recent advances in the field of counterterrorism and open source intelligence demonstrating how various existing as well as novel tools and techniques can be applied in combating covert terrorist networks A particular focus will be on future challenges of open source intelligence and perspectives on how to effectively operate in order to prevent terrorist activities *Mixed Methods Social Networks Research* Silvia Domínguez, Betina Hollstein, 2014-06-30 This edited volume demonstrates the potential of mixed methods designs for the research of social networks and the utilization of social networks for other research Mixing methods applies to the combination and integration of qualitative and quantitative methods In social network research mixing methods also applies to the combination of structural and actor oriented approaches The volume provides readers with methodological concepts to guide mixed method network studies with precise research designs and methods to investigate social networks of various sorts Each chapter describes the research design used and discusses the strengths of the methods for that particular field and for specific outcomes Computationally Intelligent Systems and their Applications Jagdish Chand Bansal, Marcin Paprzycki, Monica Bianchini, Sanjoy Das, 2021-04-24 This book covers all core technologies like neural networks fuzzy systems and evolutionary computation and their applications in the systems Computationally intelligent system is a new concept for advanced information processing The objective of this system is to realize a new approach for analyzing and creating flexible information processing of sensing learning recognizing and action taking Computational intelligent is a part of artificial intelligence AI which includes the study of versatile components to empower or encourage savvy practices in intricate and evolving situations The computationally intelligent system highly relies on numerical information supplied by manufacturers unlike AI **Natural Language Processing and Information Systems** Chris Biemann, Siegfried Handschuh, André Freitas, Farid Meziane, Elisabeth Métais, 2015-06-03 This book constitutes the refereed proceedings of the 20th International Conference on Applications of Natural Language to Information Systems NLDB 2015 held in Passau Germany in June 2015 The 18 full papers 15 short papers 14 poster and demonstration papers presented were carefully reviewed and selected from 100 submissions The papers cover the following topics information extraction distributional semantics querying and question answering systems context aware NLP cognitive and semantic computing sentiment and opinion analysis information extraction and social media NLP and usability text classification and extraction and posters and demonstrations **Social Network Analysis in Predictive Policing** Mohammad A. Tayebi, Uwe Glässer, 2016-10-11 This book focuses on applications of social network analysis in predictive policing Data science is used to identify potential criminal activity by analyzing the

relationships between offenders to fully understand criminal collaboration patterns Co offending networks networks of offenders who have committed crimes together have long been recognized by law enforcement and intelligence agencies as a major factor in the design of crime prevention and intervention strategies Despite the importance of co offending network analysis for public safety computational methods for analyzing large scale criminal networks are rather premature This book extensively and systematically studies co offending network analysis as effective tool for predictive policing The formal representation of criminological concepts presented here allow computer scientists to think about algorithmic and computational solutions to problems long discussed in the criminology literature For each of the studied problems we start with well founded concepts and theories in criminology then propose a computational method and finally provide a thorough experimental evaluation along with a discussion of the results In this way the reader will be able to study the complete process of solving real world multidisciplinary problems

Computational Linguistics Adam Przepiórkowski, Maciej Piasecki, Krzysztof Jassem, Piotr Fuglewicz, 2012-11-06 The ever growing popularity of Google over the recent decade has required a specific method of man machine communication human query should be short whereas the machine answer may take a form of a wide range of documents This type of communication has triggered a rapid development in the domain of Information Extraction aimed at providing the asker with a more precise information The recent success of intelligent personal assistants supporting users in searching or even extracting information and answers from large collections of electronic documents signals the onset of a new era in man machine communication we shall soon explain to our small devices what we need to know and expect valuable answers quickly and automatically delivered The progress of man machine communication is accompanied by growth in the significance of applied Computational Linguistics we need machines to understand much more from the language we speak naturally than it is the case of up to date search systems Moreover we need machine support in crossing language barriers that is necessary more and more often when facing the global character of the Web This books reports on the latest developments in the field It contains 15 chapters written by researchers who aim at making linguistic theories work for the better understanding between the man and the machine
