FP720 & TS710

Heating Timers

Application

FP720 & TS710 heating timers provide flexible schedule setups to suit your lifestyle and ensure that heating is only called for during the normal home routine. The timers are used to switch your gas boiler either directly or via motorised zone valves and when used together with room thermostats can provide full heating and comfort control.

Both FP720 and TS710 include a large, easy to read backlit display with straightforward intuitive layout. Current day, time and on/off period is shown in the large top section along with icons showing status of the output channels.

By pressing the CH channel button the user has the option to override each of the output relays. At the bottom of the display the channel setting is shown where the user can select for Auto, + the Boost or Constant On or Off control. This is shown for the single channel on TS710 or both channels on FP720.

FP720 can be setup to control heating and domestic hot water channels with separate schedules or 2 heating zones. Again the display differentiates between these setups and indicates the channel type on the display.
