

New research suggests
that the most effective executives
use a collection of distinct leadership styles —
each in the right measure, at just the right time.
Such flexibility is tough to put into action, but it pays
off in performance. And better yet,
it can be learned.

LEADERSHIP THAT GETS RESULTS

by Daniel Goleman

ASK ANY GROUP of businesspeople the question "What do effective leaders do?" and you'll hear a sweep of answers. Leaders set strategy; they motivate; they create a mission; they build a culture. Then ask "What *should* leaders do?" If the group is seasoned, you'll likely hear one response: the leader's singular job is to get results.

But how? The mystery of what leaders can and ought to do in order to spark the best performance from their people is age-old. In recent years, that mystery has spawned an entire cottage industry: literally thousands of "leadership experts" have made careers of testing and coaching executives, all in pursuit of creating businesspeople who can turn bold objectives — be they strategic, financial, organizational, or all three — into reality.

Still, effective leadership eludes many people and organizations. One reason is that until recently, virtually no quantitative research has demonstrated

which precise leadership behaviors yield positive results. Leadership experts proffer advice based on inference, experience, and instinct. Sometimes that advice is right on target; sometimes it's not.

But new research by the consulting firm Hay/McBer, which draws on a random sample of 3,871 executives selected from a database of more than 20,000 executives worldwide, takes much of the mystery out of effective leadership. The research found six distinct leadership styles, each springing from different components of emotional intelligence. The styles, taken individually, appear to have a direct and unique impact on the working atmosphere of a company, division, or team, and in turn, on its financial performance. And perhaps most important, the research indicates that leaders with the best results do not rely on only one leadership style; they use most of them in a given week — seamlessly and in different measure — depending on the

Daniel Goleman Leadership That Gets Results:

Leadership That Gets Results (Harvard Business Review Classics) Daniel Goleman, 2017 A leader's singular job is to get results. But even with all the leadership training programs and expert advice available, effective leadership still eludes many people and organizations. One reason says Daniel Goleman is that such experts offer advice based on inference, experience, and instinct, not on quantitative data. Now drawing on research of more than 3,000 executives, Goleman explores which precise leadership behaviors yield positive results. He outlines six distinct leadership styles, each one springing from different components of emotional intelligence. Each style has a distinct effect on the working atmosphere of a company, division, or team and in turn on its financial performance. Coercive leaders demand immediate compliance. Authoritative leaders mobilize people toward a vision. Affiliative leaders create emotional bonds and harmony. Democratic leaders build consensus through participation. Pacesetter leaders expect excellence and self-direction. And coaching leaders develop people for the future. The research indicates that leaders who get the best results don't rely on just one leadership style; they use most of the styles in any given week. Goleman details the types of business situations each style is best suited for and he explains how leaders who lack one or more of these styles can expand their repertoires. He maintains that with practice, leaders can switch among leadership styles to produce powerful results, thus turning the art of leadership into a science.
