Dangerous Trade Arms Exports Human Rights And International Reputation:

Dangerous Trade Jennifer Erickson, 2015-05-19 The United Nations's groundbreaking Arms Trade Treaty ATT which went into effect in 2014 sets legally binding standards to regulate global arms exports and reflects the growing concerns toward the significant role that small and major conventional arms play in perpetuating human rights violations conflict and societal instability worldwide Many countries that once staunchly opposed shared export controls and their perceived threat to political and economic autonomy are now beginning to embrace numerous agreements such as the ATT and the EU Code of Conduct Jennifer L Erickson explores the reasons top arms exporting democracies have put aside past sovereignty security and economic worries in favor of humanitarian arms transfer controls and she follows the early effects of this about face on export practice She begins with a brief history of failed arms export control initiatives and then tracks arms transfer trends over time Pinpointing the normative shifts in the 1990s that put humanitarian arms control on the table she reveals that these states committed to these policies out of concern for their international reputations She also highlights how arms trade scandals threaten domestic reputations and thus help improve compliance Using statistical data and interviews conducted in France Germany Belgium the United Kingdom and the United States Erickson challenges existing IR theories of state behavior while providing insight into the role of reputation as a social mechanism and the importance of government transparency and accountability in generating compliance with new norms and rules

The Incoherence of Human Rights in International Law Louisa Ashley, Nicolette Butler, 2024-09-02 Incoherence is a term that is all too often associated with the public international law regime To a great extent its incoherence is arguably a natural consequence of the fragmented nature of both the development and overall scope of the discipline Despite significant achievements since the Universal Declaration of Human Rights 1948 a coherent human rights regime that is properly integrated with other branches of public international law is still lacking This book explores this incoherent approach to human rights including specific challenges that arise as a result of the creation and regulation of legal relationships between parties state and non state that sit outside of the human rights framework with a view to considering how it may be remedied Divided into three parts the

collection provides a critical exploration of various challenges and barriers related to the absence of human rights in some instances contemporary emergence of rights and a lack of rights fulfilment in others These three situations are considered within the wider context of and difficulties facing a human rights based approach to international law Each of the three parts aligns with one of the three prime responsibilities and duties of states in respect of international human rights to promote to protect and to fulfil The contributions represent different perspectives in international law and human rights and how the global agenda of promoting human rights the rules based international order and multilateralism requires further strengthening the lens of incoherence providing a means to understand particular inconsistencies Chapters focus upon subjects including international investment law international financial contracts the arms trade indigenous peoples rights rights of peasants the right to a clean healthy and sustainable environment the right to food and transitional justice Presenting a critical exploration of key contemporary challenges and the implementation of human rights law in different contexts the collection will be of interest to a wide ranging audience of international law and international relations scholars and practitioners and students of law politics and globalisation across the world

Lawmaking under Pressure Giovanni Mantilla, 2020-12-15 In *Lawmaking under Pressure* Giovanni Mantilla analyzes the origins and development of the international humanitarian treaty rules that now exist to regulate internal armed conflict Until well into the twentieth century states allowed atrocious violence as an acceptable product of internal conflict Why have states created international laws to control internal armed conflict Why did states compromise their national security by accepting these international humanitarian constraints Why did they create these rules at improbable moments as European empires cracked freedom fighters emerged and fears of communist rebellion spread Mantilla explores the global politics and diplomatic dynamics that led to the creation of such laws in 1949 and in the 1970s By the 1949 Diplomatic Conference that revised the Geneva Conventions most countries supported legislation committing states and rebels to humane principles of wartime behavior and to the avoidance of abhorrent atrocities including torture and the murder of non combatants However for decades states had long refused to codify similar regulations concerning violence within their own borders Diplomatic conferences in Geneva twice channeled humanitarian attitudes alongside Cold War and decolonization politics even compelling reluctant European empires Britain and France to accept them *Lawmaking under Pressure* documents the tense politics behind the making of humanitarian laws that have become touchstones of the contemporary international normative order Mantilla not only explains the pressures that resulted in constraints on national sovereignty but also uncovers the fascinating international politics of shame status and hypocrisy that helped to produce the humanitarian rules now governing internal conflict

Plausible Legality Rebecca

Sanders,2018-08-01 After 9 11 American officials authorized torture extraordinary rendition indefinite detention military commissions targeted killing and mass surveillance This book analyses the role of human rights and humanitarian legal norms in shaping these practices By strategically manipulating legal rules policymakers and their lawyers successfully normalized abuses and secured impunity for human rights violations **Making a Killing: The Scourge of the Global Arms Trade**

Saghir Iqbal,2018-07-28 Each year billions of dollars worth of arms are procured between various nations despite the fact that many millions of people live in desperate poverty many will die from hunger and hunger related diseases Weapons of increasing firepower and the missiles to deliver them accurately are becoming acquired mainly through the Global Arms Trade This means that we must expect wars in the world to become increasingly violent and destructive This book focuses on what the arms trade is and its impact on the world the wars which have resulted or were sustained by this trade It is necessary to know which countries sell arms and which ones buy Also it is important to have some idea of how large the trade is The international trade in arms has considerably increased since World War 2 Major weapons aircraft missiles tanks and ships probably account for about one half of the total trade in weapons and equipment Many countries and their respective Military Industrial Complex are making a killing in the world s largest trade in the buying and selling of military technology weapons Scorecard Diplomacy

Judith G. Kelley,2017-05-02 What can the international community do when countries would rather ignore a thorny problem Scorecard Diplomacy shows that despite lacking traditional force public grades are potent symbols that can evoke countries concerns about their reputations and motivate them to address the problem The book develops an unconventional but careful argument about the growing phenomenon of such ratings and rankings It supports this by examining the United States foreign policy on human trafficking using a global survey of NGOs case studies thousands of diplomatic cables media stories 90 interviews worldwide and other documents All of this is gathered together in a format that walks the reader through the mechanisms of scorecard diplomacy including an assessment of the outcomes Scorecard Diplomacy speaks both to those keen to understand the pros and cons of US policy on human trafficking and to those interested in the central question of influence in international relations The book s companion website can be found at www.scorecarddiplomacy.org
