Supervision

Jeffrey Glanz, Sally J. Zepeda, 2015-10-30 *Supervision New Perspectives for Theory and Practice* co edited by two prominent scholars in the field Jeffrey Glanz and Sally Zepeda draws attention to supervision as a function that is often misunderstood under appreciated and frequently controversial Much has changed in the last two decades in the education world These changes have inevitably influenced the theory and practice of supervision This text includes some of the top scholars in the field in the USA to offer their insights to important topics and issues in supervision To strike a balance the editors also included award winning practitioners who share their insights about supervision We hope that this volume raises awareness to several critical issues that affect teachers administrators and policy makers With the range of topics associated with supervision we believe that the authors offer an informed and lively discussion of supervision in the present and future contexts of schools Through our efforts we believe that the multiple contexts in which supervision unfolds are examined alongside trends including high stakes testing the uses of data the work superintendents do to supervise principals and the type of supervision that builds a just and caring school culture that is culturally relevant and respectful for teachers and

leaders **Rubric Nation** Michelle Tenam-Zemach, Joseph E. Flynn, 2015-04-01 What is a rubric and how are they being used in teacher education and evaluation When did rubrics become ubiquitous in the field of education What impact do rubrics have on students teachers teacher educators and the educational enterprise This book is an edited volume of essays that critically examine the phenomenon of rubrics in teacher education evaluation and education more broadly Rubrics have seen a dramatic rise in use and presence over the past twenty five years in colleges of education and districts across the country Although there is a wealth of literature about how to make rubrics there is scant literature that explores the strengths and weaknesses of rubrics and the impact the rubric phenomenon is having in reshaping education The chapters included in this edited volume will critically reflect on the contemporary contexts of rubrics and the uses and impact of rubrics in education Since rubrics have become indelible in education it is necessary for a fuller nuanced discussion of the phenomenon Creating a book that explores these aspects of rubrics is timely and fundamental to expanding the discourse on this ubiquitous evaluation tool This book is not meant to be a series of chapters dedicated to best practices for creating rubrics nor is this text meant to present all sides of the rubric discussion Rather this text intends to offer critical polemics about rubrics that can spur greater critical discussion about a phenomenon in education that has largely been unquestioned in the literature

Teacher Supervision and Evaluation, 2003

Unfinished Business Paula Egelson, C. Steven Bingham, Barbara B. Howard, 2024-09-01

Unfinished Business: A Regional Education Laboratory Retrospective on School Improvement is authored by education professionals formerly employed at SERVE, one of the ten US federally funded education research and development laboratories. SERVE's region included the following southeastern states: Alabama, Florida, Georgia, Mississippi, North Carolina, and South Carolina. The school improvement recollections found in this book are supported by contemporaneous data collected for research and evaluation as well as literature interviews and evidence from former clients and collaborators. Each of the chapter authors wrote about a school improvement initiative in which they led or participated in developing. Compared to the other nine labs, SERVE was heavily field-based. SERVE's projects and publications focused on school improvement, research, policy, and professional development. The work was typically launched in a spirit best described as emergent design. Building on extant research and best practice, potential clients across the six-state region were approached with ideas for educational interventions and evidence to support theories of action. It is underscored that improving America's public schools, teachers, and school administrators is a continuous process involving difficult work. It is hoped that this book will offer suggestions to educators about how to implement school improvement, including what works and what doesn't, and how initiatives can evolve positively over time.

ENDORSEMENTS

This retrospective on the work done by the SERVE lab serves to underscore the important role education laboratories can play in helping schools improve the systems and processes supporting more equitable learning opportunities and higher student achievement. As the authors indicate, the work of school improvement is never finished; hence, it follows that continually trying out well-grounded interventions and examining their impacts on leadership, teaching, and learning is essential to moving improvement science forward.

Betty Fry, Southern Regional Education Board

School improvement work needs to be an all-hands-on-deck effort that engages teachers, administrators, students, parents, and guardians and stakeholders in meaningful co-ownership of helping schools be successful for all students. Unfinished Business seeks to examine the work of educational leaders and organizations who have been immersed in extended efforts to both understand and meet the various challenges of educating students. By including voices with rich experiences and perspectives and highlighting steps taken to realize successes, this book provides insights and lessons learned to reflect upon in considering next steps.

Bill Sterrett, Baylor University

What an outstanding book based on thoughtful reflections of practitioners working on improving schools! If readers want to get an understanding of federally supported research and development laboratories, this is an excellent book on lessons learned. Unfinished Business offers important technical concepts in practice, such as stakeholder involvement, emergent designs, interventions, implementation, sustainability, and organizational culture, to cite a few, but also insightful lessons on results-oriented distributed leadership. A must-read for leaders across the board, local, state,

and federal educational agencies Marco Mu oz Jefferson County Schools KY Cognitive Capital: Investing in Teacher Quality Arthur L. Costa, Robert J. Garmston, Diane P. Zimmerman, 2014 Building on the authors celebrated work in cognitive coaching this important book provides teachers schools and policy leaders with the rationale and new direction for enhancing the development of the intellectual capacity of educators their performance and their ultimate effects on student learning The authors focus on assisting teachers in developing awareness in thier own ability to make effective judgements based on all their capabilities and experiences When teachers weave internal expertise and external criteria together into the exquisite tapestry of teaching and learning they gain confidence in their ability to make a difference for all students Rather than spending time becoming better inspectors and enforcers Cognitive Captial calls for skillful leaders to engage educators though processes which promote practices that have high impacts on their students **Leading Schools in Challenging Times** Bruce Anthony Jones, Anthony Rolle, 2016-03-01 Over the past 30 years our public school system has received an unprecedented amount of attention as this concerns methods of school reform and policy strategies for bringing about this reform During the 1980s the emphasis of school reform was on transparency through school community partnerships Business and philanthropy for example became involved with issues of schooling that was unheard of prior to this period The 1980s also gave rise to issues of school finance and student performance that went beyond traditional views that tended to focus on finance adequacy to views that focused more on school finance arrangements that would lead to actual equitable outcomes in student performance The 1990s witnessed the emergence of the comprehensive school reform movement whereby curriculum outsourcing occurred at rates that had never occurred before With this movement the role of teachers and school leaders in the creation of school curriculum diminished as school districts increasingly purchased vendor related curriculum packages which included teacher and leader training modules and methods of curriculum assessment On the heels of the increasing tendency of school districts to outsource school curriculum to curriculum vendors came a rise in demands for school accountability and school outcomes This was particularly evident with the passage of No Child Left Behind Act NCLB 2001 NCLB was also developed within a political context that called for demands in the academic improvement of schools and school districts that housed historically disenfranchised students These demands were particularly important as the nation experienced and continues to experience dramatic increases in student racial and ethnic diversity This volume entitled *Leading Schools in Challenging Times Eye to the Future* discusses varying types of school leadership in the context of key topics that have been at the center of on going school reform in the United States These topics include challenges opportunities and issues associated with our administrator and teacher leadership pipeline preparation and development leadership and school finance reform leadership and changing student and population demographics leadership and the role of community issues of leadership policy public accountability and school performance outcomes The authors also explicate these issues with a view to the future and the status of leadership in our public school

system **Rethinking Teacher Supervision and Evaluation** Kim Marshall, 2009-10-30 In this important book education expert Kim Marshall shows how to break away from the typical and often ineffective evaluation approaches in which principals use infrequent classroom visits or rely on standardized test scores to assess a teacher's performance. Marshall proposes a broader framework for supervision and evaluation that enlists teachers in improving the performance of all students. Emphasizing trust building and teamwork, Marshall's innovative four-part framework shifts the focus from periodically evaluating teaching to continuously analyzing learning. This book offers school principals a guide for implementing Marshall's framework and shows how to make frequent informal classroom visits followed by candid feedback to each teacher. Work with teacher teams to plan thoughtful curriculum units rather than focusing on individual lessons. Get teachers as teams involved in low-stakes analysis of interim assessment results to fine-tune their teaching and help struggling students. And use compact rubrics for summative teacher evaluation. This vital resource also includes extensive tools and advice for managing time as well as ideas for using supervision and evaluation practices to foster teacher professional development.

A Guide to Impactful Teacher Evaluations Joseph O. Rodgers, 2021-03-10 What if everything we thought we knew about effective teacher evaluations was wrong? *A Guide to Impactful Teacher Evaluations* walks educators through an important shift in thinking about how to evaluate teachers from systems focused on individuals and results to solutions focused on collectives and processes. Disregarding older ineffective models that rely on faulty assumptions, this book embraces new approaches for measuring teacher competency that achieve valid assessment of effective teaching, teacher professional growth, and student learning. Chapters explore teacher evaluation systems based on professional learning community principles, confront the current system of teacher evaluation that has led to frustration, criticism, and disrespect, provide strategies for delivering new skills and supporting teachers' growth, and include Tips and Talking Points for schools and districts. Outlining best practice and sharing actionable tools grounded in collaboration and teamwork, this book helps K-12 school leaders explore teacher evaluation that has a real and lasting impact on the profession and student learning.
