fiction and the way it is taught and studied **Twenty-First Century Fiction** S. Adiseshiah, R. Hildyard, 2015-12-04 This lively new volume of essays examines what happens now in 21st century fiction Fresh theoretical approaches to writers such as Salman Rushdie David Peace Margaret Atwood and Hilary Mantel and identifications of 21st century themes tropes and styles combine to produce a timely critical intervention into genuinely contemporary fiction *Alien Imaginations* Ulrike Küchler, Silja Maehl, Graeme Stout, 2015-02-12 As both an extra terrestrial and a terrestrial migrant the alien provides a critical framework to help us understand the interactions between cultures and to explore the transgressive force of travel over geographical cultural or linguistic borders Offering a perspective on the alien that connects to scholarship on immigration and globalization *Alien Imaginations* brings together canonical and contemporary works in the literature and cinema of science fiction and transnationalism By examining the role of the alien through the themes of language anxiety and identity the essays in this collection engage with authors such as H G Wells Eleanor Arnason Philip K Dick and Yoko Tawada as well as directors such as Neill Blomkamp James Cameron and Michael Winterbottom Focusing on works that are European and North American in origin the readings in this volume explore their critical intent and their potential to undermine many of the central notions of Western hegemonic discourses *Alien Imaginations* reflects upon contemporary cultural imaginaries as well as the realities of migration labor and life suggesting models of resistance if not utopian horizons *Dystopia on Demand: Technology, Digital Culture, and the Metamodern Quest in Complex Serial Dystopias* Laura Winter, 2024-01-29 Serial storytelling has the advantage of unlocking rather than simplifying the complexities of digital culture With their worldbuilding potential TV series open up new artistic horizons particularly for the dystopian genre Situated at the nexus of dystopia complex TV and a metamodern cultural logic *Dystopia on Demand Technology Digital Culture and the Metamodern Quest in Complex Serial Dystopias* offers readers novel insights into the dynamics of serial dystopias in the contemporary streaming landscape Introducing the term complex serial dystopias to describe series that allow audiences to engage with the dystopian premise from multiple angles the book examines four Anglo American series including *Black Mirror* *Mr Robot* *Westworld* and *Kiss Me First* The in depth analyses trace the variety of ways in which these series offer critical reflections on the human technology entanglement in digital culture **Science Fiction and the Historical Novel** Ian P. MacDonald, Kate Polak, 2024-09-16 If you woke to realize that you could rewrite your yesterday without knowing the kind of tomorrow it would grant you would you do it Are the authors of our destiny working with an outline or spit balling confusing plotlines Since the past changes possible futures to what alighting butterfly should we pay the most heed This book explores the liminal space between speculative fiction and the historical novel Staged as a transnational multicultural conversation it takes up a call originally made by Fredric Jameson in *Archaeologies of the Future* wherein he describes that flashpoint between speculative and historical genres as the symptom of a mutation in our relationship to historical time itself Drawing together postcolonial feminist cultural Indigenous and cognitive approaches *Science Fiction and the Historical Novel* asks

what the past can offer a future oriented world and how the future can be imagined in relation to a past that seeks narratives of inevitability rather than possibility Engaged with the idea of the past as a model for the future authors in this volume probe the extent to which historical scripts delimit possibilities and how authors engaged with the practice of alternative pasts rewrite potentialities in the present

Green Utopianism Karin Bradley, Johan Hedrén, 2014-03-21 Utopian thought and experimental approaches to societal organization have been rare in the last decades of planning and politics Instead there is a widespread belief in ecological modernization that sustainable societies can be created within the frame of the current global capitalist world order by taking small steps such as eco labeling urban densification and recycling However in the context of the current crisis in which resource depletion climate change uneven development and economic instability are seen as interlinked this belief is increasingly being questioned and alternative developmental paths sought This collection demonstrates how utopian thought can be used in a contemporary context as critique and in exploring desired futures The book includes theoretical perspectives on changing global socio environmental relationships and political struggles for alternative development paths and analyzes micro level practices in co housing alternative energy provision use of green space transportation co production of urban space peer to peer production and consumption and alternative economies It contributes research perspectives on contemporary green utopian practices and strategies combining theoretical and empirical analyses to spark discussions of possible futures
