Glick, Elinor Shaffer, 2014-05-22 Beyond his pivotal place in the history of scientific thought Charles Darwin's writings and his theory of evolution by natural selection have also had a profound impact on art and culture and continue to do so to this day The Literary and Cultural Reception of Charles Darwin in Europe is a comprehensive survey of this enduring cultural impact throughout the continent With chapters written by leading international scholars that explore how literary writers and popular culture responded to Darwin's thought the book also includes an extensive timeline of his cultural reception in Europe and bibliographies of major translations in each country

The Practice of Philology in the Nineteenth-Century Netherlands Ton Kalmthout, Huib Zuidervaat, 2025-10-01 The Netherlands have a long and important tradition in scholarly philology For instance in the early days of Leiden University philology or the critical examination of classical texts was regarded as a cutting edge science This field of scholarship had far reaching implications on disciplines such as theology chronology astronomy history law and other demarcated bodies of knowledge identified as a separate science Regardless of the exact field of inquiry philologists as protectors and teachers of the written heritage always played a pivotal role in the formation of the cultural repertoire of the educated public As men of learning and high esteem philologists also exerted influence outside the cultural sphere especially in politics and religion The ever changing composition of the philological frame of reference made no difference in this respect But in the nineteenth century the practice of philology was passing a crucial phase of change In both its object of study and in its methods several fundamental modifications occurred Texts in the vernacular and national philologies attracted more and more attention of the public and neo philology succeeded in taking over the central position traditionally occupied by classical philology Subfields such as linguistics edition technique and history grew into new more or less independent sub disciplines whereas scientific methods such as stemmatology and comparative approaches were introduced in the humanities This redesigned the landscape of philology radically New boundaries became apparent and existing ones were questioned or drawn sharper At the time philology underwent an accelerated process of differentiation and professionalization Philology demarcated its own more or less independent sphere with a specific authority The establishment of a branch of national philology can be regarded as an example of discipline formation in the humanities This fascinating process of change and the search for new boundaries in Dutch philology is highlighted in this book The Practice of Philology in the Netherlands in the Nineteenth Century the first book on this topic in the English language

The Eclipse of Liberal Protestantism in the Netherlands Tom-Eric Krijger, 2019-09-16 In The Eclipse of Liberal

Protestantism in the Netherlands Tom Eric Krijger is the first to offer a synthesis of the development of the Protestant modernist movement in Dutch religious social cultural and political life between 1870 and 1940 In historiography the liberal Protestant community is said to have lost appeal and influence in these decades due to a lack of theological clarity inner harmony and organisation Analysing liberal Protestants self perception vis vis Christian orthodoxy self understanding as a faith community attitude towards other alternatives to orthodoxy class consciousness literary criticism political commitment and involvement with foreign mission Krijger challenges this view Making an international comparison he argues that the Dutch modernist movement failed to make headway primarily due to liberal Protestant expectations and discourse

From Bayle to the Batavian Revolution Wiep van Bunge, 2018-10-22 This book is an attempt to assess the part played by philosophy in the eighteenth century Dutch Enlightenment Following Bayle s death and the demise of the radical Enlightenment Dutch philosophers soon embraced Newtonianism and by the second half of the century Wolffianism also started to spread among Dutch academics Once the Republic started to crumble Dutch enlightened discourse took a political turn but with the exception of Frans Hemsterhuis who chose to ignore the political crisis it failed to produce original philosophers By the end of the century the majority of Dutch philosophers typically refused to embrace Kant s transcendental project as well as his cosmopolitanism Instead early nineteenth century Dutch professors of philosophy preferred to cultivate their joint admiration for the Ancients
