Soft Target Mia Kay, 2015-11-16 Wounded FBI agent Gray Harper will honor his dead partner by returning to work as soon as the Bureau shrinks him for duty In the meantime a long vacation in his best friend's hometown sounds like the perfect distraction But Nate Mathis has another plan His twin sister Maggie has a stalker and Gray's the only one Nate trusts to catch the bastard Admitting she's scared would bring the cavalry and Maggie Mathis has always taken care of herself She certainly doesn't need a bodyguard As far as she knows Gray's in town to work as the Mathis family's new business manager That she's always found her brother's friend handsome is something she'll keep to herself Gray's real job would be a lot easier if he didn't have to keep his intentions from Maggie It would also be easier if he didn't want to sleep with her He certainly shouldn't have kissed her good night There never should have been a second date All too soon the line between responsibility and pleasure blurs Gray hates to think of Maggie in danger He hates that he thinks about Maggie too much and of the day he won't be there to protect her Secrets aren't easy to keep from those you love but Gray needs to guard several with his life before he risks losing Maggie forever

Materials Issues for Generation IV Systems Véronique Ghetta, Dominique Gorse, Dominique Mazière, Vassilis Pontikis, 2008-04-23 Global warming shortage of low cost oil resources and the increasing demand for energy are currently controlling the world's economic expansion while often opposing desires for sustainable and peaceful development In this context atomic energy satisfactorily fulfills the criteria of low carbon gas production and high overall yield However in the absence of industrial fast breeders the use of nuclear fuel is not optimal and the production of high activity waste materials is at a maximum These are the principal

reasons for the development of a new fourth generation of nuclear reactors minimizing the undesirable side effects of current nuclear energy production technology while increasing yields by increasing operation temperatures and opening the way for the industrial production of hydrogen through the decomposition of water The construction and use of such reactors is hindered by several factors including performance limitations of known structural materials particularly if the life of the projected systems had to extend over the periods necessary to achieve low costs at least 60 years This book collects lectures and seminars presented at the homonymous NATO ASI held in autumn 2007 at the Institut d Etudes Scientifiques in Carg se France The adopted approach aims at improving and coordinating basic knowledge in materials science and engineering with specific areas of condensed matter physics the physics of particle matter interaction and of radiation damage It is our belief that this methodology is crucially conditioning the development and the industrial production of new structural materials capable of coping with the requirements of these future reactors **Firemen's Magazine** ,1885
