Capitalism And Christianity American Style Capitalism And Christianity American Style:

Capitalism and Christianity, American Style William E. Connolly, 2008-04-09 A leading political theorists impassioned call for the democratic left to counter the conservative stranglehold over American religious and economic culture **Radical Political Theology** Clayton Crockett, 2013-10-01 In the 1960s the strict opposition between the religious and the secular began to break down blurring the distinction between political philosophy and political theology This collapse contributed to the decline of modern liberalism which supported a neutral value free space for capitalism It also deeply unsettled political religious and philosophical realms forced to confront the conceptual stakes of a return to religion Gamely intervening in a contest that defies simple resolutions Clayton Crockett conceives of the postmodern convergence of the secular and the religious as a basis for emancipatory political thought Engaging themes of sovereignty democracy potentiality law and event from a religious and political point of view Crockett articulates a theological vision that responds to our contemporary world and its theo political realities Specifically he claims we should think about God and the state in terms of potentiality rather than sovereign power Deploying new concepts such as Slavoj i ek s idea of parallax and Catherine Malabou s notion of plasticity his argument engages with debates over the nature and status of religion ideology and messianism Tangling with the work of Derrida Deleuze Spinoza Antonio Negri Giorgio Agamben Alain Badiou John D Caputo and Catherine Keller Crockett concludes with a reconsideration of democracy as a form of political thought and religious practice underscoring its ties to modern liberal capitalism while also envisioning a more authentic democracy unconstrained by those ties

Visionary Pragmatism Romand Coles, 2016-01-28 As neoliberal capitalism destroys democracy commonwealth and planetary ecology the need for radically rethinking and generating transformative responses to these catastrophes is greater than ever Given that Romand Coles presents an invigorating new mode of scholarship and political practice he calls visionary pragmatism Coles explores the profound interrelationships among everyday micropractices of grassroots politics and pedagogy institutional transformation and political protest through polyfocal lenses of political and social theory neuroscience research complex systems theory and narratives of his cutting edge action research Visionary Pragmatism offers a theory of revolutionary cooptation that in part selectively employs practices and strategies of the dominant order to radically alter the coordinates of power and possibility Underscoring the potential vitality and power of emerging democratic practices to change the world Visionary Pragmatism s simultaneous theoretical rigor and grounding in actual political and ecological practices provokes and inspires new ways of cocreating knowledge and action in dark times **T&T Clark**

Handbook of Christian Theology and Climate Change Hilda P. Koster, Ernst M. Conradie, 2019-12-12 The T these essays are critically engaged by respondents situated in other geographic regions minority communities non Christian traditions or non theological disciplines Structured in seven main parts the handbook explores 1 the need for collaboration with disciplines outside of Christian theology to address climate change 2 the need to find common moral ground for such

collaboration 3 the difficulties posed by collaborating with other Christian traditions from within 4 the questions that emerge from such collaboration for understanding the story of God's work and 5 God's identity and character 6 the implications of such collaboration for ecclesial praxis and 7 concluding reflections examining whether this volume does justice to issues of race gender class other animals religious diversity geographical divides and carbon mitigation This rich ecumenical cross cultural conversation provides a comprehensive and in depth engagement with the theological and moral challenges raised by anthropogenic climate change

Routledge Handbook of Marxian Economics David M. Brennan, David Kristjanson-Gural, Catherine P. Mulder, Erik K. Olsen, 2017-03-16 Most developed economies are characterized by high levels of inequality and an inability to provide stability or opportunity for many of their citizens Mainstream economics has proven to be of little assistance in addressing these systemic failures and this has led both scholars and students to seek alternatives One such alternative is provided by Marxian economics In recent decades the field has seen tremendous theoretical development and Marxian perspectives have begun to appear in public discourse in unprecedented ways This handbook contains thirty seven original essays from a wide range of leading international scholars recognized for their expertise in different areas of Marxian economics Its scope is broad ranging from contributions on familiar Marxist concepts such as value theory the labor process accumulation crisis and socialism to others not always associated with the Marxian canon like feminism ecology international migration and epistemology This breadth of coverage reflects the development of Marxian economic and social theory and encompasses both the history and the frontiers of current scholarship This handbook provides an extensive statement of the current shape and future direction of Marxian economics The Routledge Handbook of Marxian Economics is an invaluable resource for students researchers and policy makers seeking guidance in this field It is designed to serve both as a reference work and as a supplementary text for classroom use with applications for courses in economics sociology political science management anthropology development studies philosophy and history

Zizek and Communist Strategy Chris McMillan, 2013-10-30 Communist conservative anti semantic Slavoj Zizek's work attracts a lot of labels most of them pejorative Chris McMillan seeks to identify Zizek's unique and productive contribution to social and political theory constructing a response to the diff

Human Nature, Interest, and Power Tex Sample, 2013-10-17 This book criticizes three basic concepts in Reinhold Niebuhr's social thought his views of human nature interest and power Attention is directed especially at the way Niebuhr's concepts lack sufficient historicity obscure social and political dynamics and finally lack adequate descriptive power An alternative to each of these concepts is offered and used as a way to open up social thought to more complex analysis more concrete and material uses and a discussion of implications for alternative direction and action

Common Goods Catherine Keller, Elias Ortega-Aponte, 2015-12-01 In the face of globalized ecological and economic crises how do religion the postsecular and political theology reconfigure political theory and practice As the planet warms and the chasm widens between the 1 percent and the global 99 what thinking may yet energize

new alliances between religious and irreligious constituencies This book brings together political theorists philosophers theologians and scholars of religion to open discursive and material spaces in which to shape a vibrant planetary commons Attentive to the universalizing tendencies of the common the contributors seek to reappropriate the term in response to the corporate logic that asserts itself as a universal solvent In the resulting conversation the common returns as an interlinked manifold under the ethos of its multitudes and the ecology of its multiplicity Beginning from what William Connolly calls the palpable fragility of things Common Goods assembles a transdisciplinary political theology of the Earth With a nuance missing from both atheist and orthodox religious approaches the contributors engage in a multivocal conversation about sovereignty capital ecology and civil society The result is an unprecedented thematic assemblage of cosmopolitics and religious diversity of utopian space and the time of insurrection of Christian socialism radical democracy and disability theory of quantum entanglement and planetarity of theology fleshly and political *Woven Together* James S. Mastaler, 2019-04-17

Now more than ever it is critical that religious stories encompass a call to moral responsibility for the earth and to the global poor But the divorce between religious faith and science has left many people feeling unmoored and adrift at a time when we ought to be drawing closer to nature and each other It is a theological activity to see the world as it really is to look its suffering squarely in the face and tend to a wounded world The global poor especially women among them are some of the world's most disenfranchised people Their realities must inform the conversations about God and the world that people of faith are having in the church There is no salvation from the world only salvation with the world This means learning to live as a member of a community of mutual responsibility to look inward and ask ourselves how we might turn outward and live differently Concern for nature and social justice must become a central part of Christian moral life *Climate Machines, Fascist Drives, and Truth* William E. Connolly, 2019-09-06 In this new installation of his work William E Connolly examines entanglements between volatile earth processes and emerging cultural practices highlighting relays among extractive capitalism self amplifying climate processes migrations democratic aspirations and fascist dangers In three interwoven essays Connolly takes up thinkers in the minor tradition of European thought who unlike Cartesians and Kantians cross divisions between nature and culture He first offers readings of Sophocles and Mary Shelley asking whether close attention to the Anthropocene could perhaps have arrived earlier had subsequent humanists absorbed their lessons He then joins Deleuze and Guattari's notion of an abstract machine with contemporary earth sciences doing so to compare the Antique Little Ice Age of the late Roman empire to contemporary relays between extractive capitalism and accelerating climate processes The final essay stages a dramatic dialogue between Alfred North Whitehead and Michel Foucault about the pursuit of truth during a time of planetary turbulence With *Climate Machines Fascist Drives and Truth* Connolly forges incisive interventions into key issues of our time
